

Clean Cooking  
Experiences from the field  
EU Delegation to  
Dominican Republic

WHO?

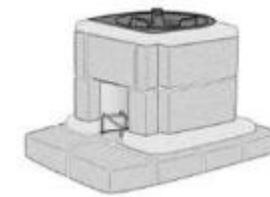

- Mountain areas
- Critical poverty
- Limited access to basic services

# HOW?

- **Technology: in-situ stoves, local needs, and locally produced**
- **Price: subsidies from the private sector to reduce the cost**
- **Wider health approach**

**RESULTS**

**1,123  
families**

**Total  
252,067  
EUR**

**224 EUR  
/ stove**

**5,610 people**

## LESSONS LEARNT

- ➔ Need to follow-up; technological and cultural changes.
- ➔ Education; train women multipliers on the correct use of stoves

- +
- +
- Take into account practical aspects of cooking and feeding
- Alliances with local organizations and private sector

- ➔ More nutritional food
- ➔ Linkages with Environment
