# Results and indicators for Development

## Results and indicators for Development

This **guidance for action design** has been developed by INTPA Unit D4 “Performance, Results and Evaluation; Internal Communication, Knowledge Management and Collaborative Methods” jointly with INTPA Thematic Units.

It is **addressed** to all colleagues involved in the preparation of action documents and project documents and offers a handy tool to develop solid logical framework matrices. It identifies clear and measurable results statements that are in line with INTPA policy priorities, as well as with the UN Sustainable Development Goals (SDGs), along with a range of good indicators to monitor progress. It will be updated regularly to reflect evolving priorities.

Its **main objective** is to enhance the quality of INTPA interventions – both in terms of design as well as of monitoring and reporting in the course of implementation.

The **need for this type of guidance** was identified in the framework of the results-reporting process led by INTPA D4, as well as through its systematic review of all action documents presented to Quality Review Group meetings.

The present guidance covers INTPA strategies in various sectors, and presents for each sector:

**1. EU policy priorities:** a short narrative explaining EU policy priorities and commitments as articulated in key policy and strategic documents.

**2. Results Chain:** a diagram showing the main results (impact, outcomes, outputs) that EU development interventions are expected to achieve in the sector, reflecting EU policy priorities and commitments.

**3. List of Sector Indicators:** examples of measurable indicators associated to each result statement are provided, that may be used in Logframe Matrices at project/ programme level.

You can access the online Sector Indicator Guidance at <https://europa.eu/capacity4dev/results-and-indicators>. For further information and/or to provide feedback please contact INTPA Unit O4 at [INTPA-EU-RESULTS@ec.europa.eu](mailto:INTPA-EU-RESULTS@ec.europa.eu)

# 1. EU Policy Priorities

SDG 16.3 and the New Consensus on Development recognise that the promotion of the **rule of law and justice** are at the core of **sustainable development and long-term peace and stability**. The rule of law and the operation of the justice sector are fundamentally inter-connected. The justice sector should both uphold the rule of law and function according to its principles. The Consensus stipulates that the EU and its Member States will promote and foster efficient, transparent, independent, open and accountable justice systems and will promote access to justice for all – in particular the poor and persons in vulnerable situations.

The EU provides targeted support to justice systems worldwide, aiming to enhance their independence, impartiality, accountability, accessibility, efficiency and quality, and increase their compliance with international human rights standards. Interventions aim to promote the independence and impartiality of relevant justice actors, strengthen their capacities and improve management and performance of courts. The EU also pays special attention to improving prison and detention conditions, and to the promotion of access to justice for all, particularly for women, children and vulnerable groups. Access to effective and fair justice systems is essential for addressing the underlying causes of poverty and inequality, and for contributing to shared prosperity, inclusive growth and a healthy business environment.

The proposed **justice/rule of law results chain** is a practical tool that aims to support DEVCO staff in the design of justice interventions in line with the objectives of SDG 16.3 and the New Consensus on Development.

The proposed results chain focuses on three main components at **output level**:

1. legal empowerment of people and access to justice;
2. capacity building of justice actors, transparency and accountability;
3. reforms and the legal institutional framework.

The previously mentioned three components are crucial for attaining five main results at **outcome level**:

1. improved access to justice for all;
2. improved accountability, transparency and credibility of the justice system;
3. improved efficiency and quality of justice;
4. improved individual and institutional independence and impartiality of the justice system;
5. improved prison management and detention conditions in line with human rights standards.

Those five main results are crucial for promoting respect for the right to a fair trial and equality before the law and, in the end, for promoting the rule of law and respect of human rights at **impact level**.

This results chain and the list of proposed indicators are a practical tool that will need to be adapted to the specific context and circumstances of each country and intervention. They do not aim to be exhaustive and in several cases will have to be used in complementarity with other results chains, such as those on anti-corruption, democracy, SSR, etc. This results chain and the list of proposed indicators also aim to be an interactive tool, to be adapted and improved over time taking into consideration the feedbacks of its users.

EU key reference documents on EU support to justice reforms and the rule of law:

1. [“Support for justice and the rule of law”, Tools and Methods Series, Reference Document no. 15.](#)
2. [“Support for justice reform in ACP countries”, Tools and Methods Series, Reference Document no. 9](#)
3. [“Inspiring change - EU support to rule of law, justice and security sector reform”](#)

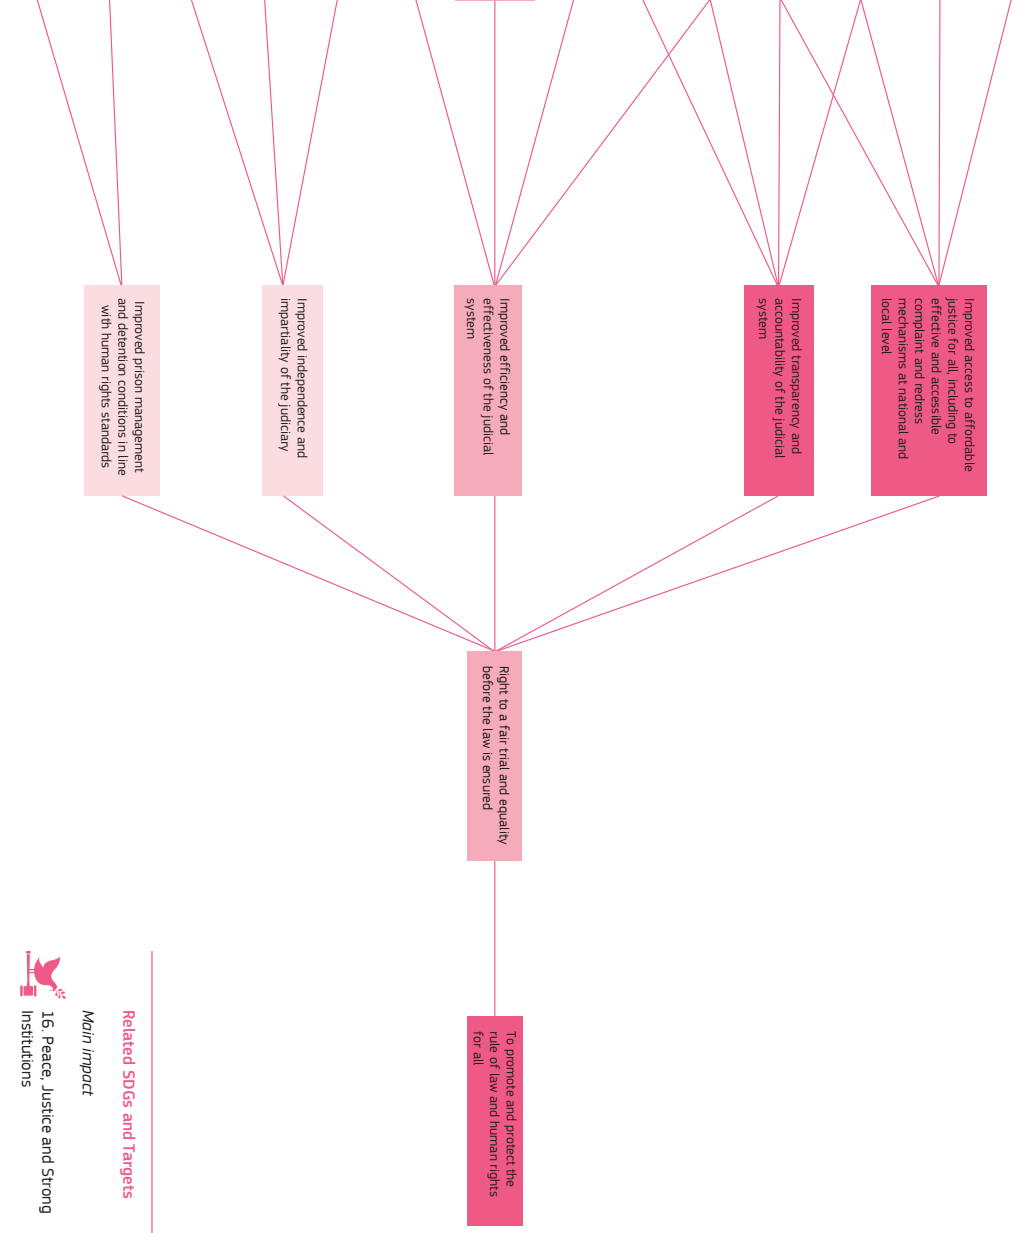

# 2. Results Chain

**Duty bearers**  
Reforms of the legal and institutional framework

**Duty bearers**  
Capacity building of justice actors at large, transparency and accountability (public as well as private)

**Rights holders**  
Legal empowerment of people and access to justice

- OUTPUTS**
- Legal aid schemes (in the broad sense, i.e. including legal representation) for people without financial means developed and operational
  - Strengthened capacity of individuals and CSOs to scrutinise institutions' performance and support individuals in claiming and defending their rights (e.g. through awareness-raising and advocacy campaigns, legal advice, monitoring of trials, etc.)
  - Promoted access to legal information for the public (e.g. about the justice system in general, court fees, how to initiate a claim, etc., through bulletin boards, leaflets, websites and media)
  - Improved capacities of justice actors to meet the justice needs of the population (e.g. support to the reorganisation of the judicial map/ geographical coverage of courts, funding of mobile courts, set up of front desks in courts etc.)
  - Promoted access to legal information for professionals (e.g. legal databases and publications, publication of relevant case law, websites, statistics, etc.)
  - Increased capacities of different justice actors to develop and enforce codes of ethics and professional conduct (e.g. support to drafting of code of ethics and professional conduct, support to judicial inspections etc.)
  - Increased management, administrative and technical capacities of the justice actors, including the Ministry of Justice, Supreme Council of the Judiciary, courts, prosecution services, and lawyers
  - Established mechanisms/platforms for improving cooperation and coordination between justice actors (e.g. coordination arrangements between prosecution and courts with respect to organisation of criminal hearings, joint training between investigators and prosecutors, etc.)
  - Developed or revised legal framework for civil, criminal and administrative proceedings in line with international best standards (e.g. revision of relevant codes etc.)
  - Developed legal and regulatory frameworks related to individual independence and impartiality of judges and prosecutors (e.g. merit-based methods of appointment and promotion, security of tenure, financial security, fair disciplinary proceedings, set up of self-governing bodies, etc.)
  - Developed legal and regulatory framework on the system of judicial self-administration in line with the principle of the separation of powers
  - Promoted provision of adequate resources to justice sector (e.g. through awareness raising of relevant state actors and/or special conditions for budget support disbursement and policy dialogue in budget support operations)
  - Developed or revised penitentiary legal and regulatory framework in line with international best standards (e.g. set up of a specialised body of prison guards, revision of prison conditions, etc.)
  - Alternative measures to detention and imprisonment, and diversion and rehabilitation mechanisms developed and promoted (incl. for children in conflict with the law)

## 3. List of Sector indicators

Result	Indicator(s)
<p> <b>Impact</b></p> <p><b>To promote and protect the rule of law and human rights for all</b></p>	<p>✔ Country score or ranking in the World Justice Project Rule of Law Index (please select whether you prefer to use the country score or its global ranking in the world)</p> <p><i>Data source</i>      <a href="#">The World Justice Project</a></p> <p>✔ Country score for rule of law according to the Worldwide Governance Indicators (WGI) Project</p> <p><i>Data source</i>      <a href="#">Worldwide Governance Indicators (WGI)</a></p> <p>✔ Ibrahim Index of African Governance (IIAG) – Overall Rule of Law score</p> <p><i>Data source</i>      <a href="#">Ibrahim Index of African Governance (IIAG)</a> Data can be explored online <a href="#">here</a> and can be downloaded from <a href="#">here</a></p> <p>✔ Bertelsmann Transformation Index (BTI) – <i>Rule of law index score</i></p> <p><i>Data source</i>      <a href="#">BTI Atlas</a> The BTI also prepares individual country reports, available <a href="#">here</a>.</p>
Result	Indicator(s)
<p> <b>Medium-Term Outcome</b></p> <p><b>Right to a fair trial and equality before the law is ensured</b></p>	<p>✔ Average score of expert perception on the protection of the rights of defendants and victims</p> <p><i>Data source</i>      At least two rounds of expert survey as part of the project M&amp;E system</p> <p>✔ Conviction rates for [group X] defendants provided with legal representation (represented as a ratio of conviction rates for defendants with lawyer of their own choice)</p> <p><i>Data source</i>      Ministry of Justice records if available. Otherwise the project will need to conduct specialized studies (surveys) at the beginning and end of implementation</p> <p>✔ Average expert assessment score on whether judges impose different punishments for the same type of crime based on a defendant's or victim's personal or ethnic characteristics</p> <p><i>Data source</i>      At least two rounds of expert surveys as part of the project M&amp;E system</p>
Result	Indicator(s)
<p> <b>Short-Term Outcome</b></p> <p><b>Improved access to affordable justice for all, including to effective and accessible complaint and redress mechanisms at national and local level</b></p>	<p>✔ Average score of expert perception on the availability of free legal assistance for indigent defendants</p> <p><i>Data source</i>      At least two rounds of expert surveys as part of the Project M&amp;E system</p> <p>✔ Proportion of victims of violence in the previous 12 months who reported their victimization to competent authorities or other officially recognized conflict resolution mechanisms (disaggregated by gender, sex, age, marginalised groups)</p> <p><i>Data source</i>      SDG monitoring – likely country level only At least two rounds of local surveys as part of the project M&amp;E system</p>

Result	Indicator(s)
	<p>✔ Number of cases heard in project-supported [mobile*] courts (disaggregated by type of case: civil, criminal or administrative)</p> <p><i>Data source</i> Project M&amp;E system –database maintained by the project team based on the courts' data</p>
	<p>✔ Number of sentences passed in project-supported [mobile*] courts (disaggregated by type of case: civil, criminal or administrative)</p> <p><i>Data source</i> Project M&amp;E system –database maintained by the project team based on the courts' data</p>
	<p>✔ Number of people who received public representation free of charge (disaggregated by sex, age, disability, and type of case: civil, criminal or administrative)</p> <p><i>Data source</i> Ministry of Justice reports to be requested by the project team</p>
	<p>✔ Annual public budget allocated to justice sector as a percentage of the State budget</p> <p><i>Data source</i> Budget data provided by the government, at the beginning and end of intervention</p>
	<p>✔ Annual ratio of allocated vs. executed budget for the justice sector</p> <p><i>Data source</i> Budget data provided by the government, at the beginning and end of intervention</p>
	<p>✔ Annual public budget allocated to legal aid</p> <p><i>Data source</i> Budget data provided by the government, at the beginning and end of intervention</p>
	<p>✔ Annual ratio of allocated vs. executed budget for legal aid</p> <p><i>Data source</i> Analysis of budget data provided by the government, at the beginning and end of intervention</p>
	<p>✔ Average score of expert perception on the quality of legal representation</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the Project M&amp;E system</p>
	<p>✔ Average score of expert perception on the availability of interpreter</p> <p><i>Data source</i> At least two rounds of expert surveys apart of the project M&amp;E system</p>
	<p>✔ Proportion of requests for legal assistance and free interpreters being met (criminal and civil proceedings) annually</p> <p><i>Data source</i> Prison statistics (monthly/quarterly/ annually collected by prison records unit and prison case management system</p>
	<p>✔ Average score of expert perception on access to redress for miscarriage of justice</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Number of reported cases of miscarriage of justice</p> <p><i>Data source</i> Administrative records Project M&amp;E system (survey)</p>

Result	Indicator(s)
	<p>✔ % of public survey respondents who report that victims of crime have to pay official or unofficial fees often or very often in order to have their complaints proceed to court</p> <p><i>Data source</i> At least two rounds of public surveys to be conducted by the project</p>
	<p>✔ Existence of court fees required to start a proceeding at a court of general jurisdiction (disaggregated by type of case)</p> <p><i>Data source</i> Public records from e.g. the National Institute of the Statistics or the Ministry of Justice</p>
	<p>✔ Number of judges per population (disaggregate by urban / rural area)</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Proportion of population under x hours of fully functioning court</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Number of cases which are investigated, prosecuted and adjudicated by the relevant institutions, by type of cases , e.g. criminal case, civil case</p> <p><i>Data source</i> For criminal cases: prison records; For civil: reports of Ministry of Justice</p>
	<p>✔ Number of cases of human rights abuses, including gender based and sexual violence, brought to court</p> <p><i>Data source</i> Performance data from the LACON Pro Bono Clearing House Database, NPS CMS and other records</p>

Result	Indicator(s)
<p> <b>Short-Term Outcome</b></p> <p><b>Improved transparency and accountability of the judicial system</b></p>	<p>✔ % of the population who perceive the overall quality of justice dispensed as good or very good</p> <p><i>Data source</i> At least two rounds of public surveys as part of the project M&amp;E system</p>
	<p>✔ Status of quality standards body for judicial officials (including judges, lawyers etc.), or a complaints body for dealing with judicial officials</p> <p><i>Data source</i> Project M&amp;E system: government/ parliamentary decision on the establishment of the new body</p>
	<p>✔ % of people who partly or fully agree agree that judges and prosecutors are generally respectful of the rights of defendants and victims (disaggregated by sex)</p> <p><i>Data source</i> At least two rounds of public surveys as part of the project M&amp;E system</p>
	<p>✔ % of people who partly or fully agree that courts treat people fairly regardless of their income, race, national or social origin, gender or religion (disaggregated by sex)</p> <p><i>Data source</i> At least two rounds of public surveys as part of the project M&amp;E system</p>
	<p>✔ % of people who partly or fully agree that judges are able to make decisions without direct or indirect interference by Government or politicians (disaggregated by sex)</p> <p><i>Data source</i> At least two rounds of public surveys as part of the project M&amp;E system</p>

Result	Indicator(s)
	<p>✔ Average expert review score on whether internal procedures and mechanisms exist within prosecution services to assess and monitor compliance with departmental performance guidelines</p> <p><i>Data source</i> At least two rounds of expert review of relevant official documents as part of the project M&amp;E system</p>
	<p>✔ Average expert review score on whether courts have performance guidelines and a system for monitoring performance that holds judges accountable for unnecessary delays in proceedings, case backlog, or absenteeism</p> <p><i>Data source</i> AA at least two rounds of expert review of relevant official documents as part of the project M&amp;E system</p>
	<p>✔ Number of sanctions pronounced against judges and public prosecutors (disaggregated by type of sanctions)</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Number of sanctions pronounced against lawyers (disaggregated by type of sanctions)</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Proportion of persons with judicial functions (e.g. judges and prosecutors) formally investigated for breach of duty, irregularity, abuse (e.g. for corruption)</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Proportion of formal investigations of person with judicial functions resulting in disciplinary action or prosecution</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Country score for public sector accountability and transparency according to the Ibrahim Index of African Governance (IIAG)</p> <p><i>Data source</i> <a href="#">Ibrahim Index of African Governance (IIAG)</a>. Data can be explored online <a href="#">here</a> and can be downloaded from <a href="#">here</a></p>

Result	Indicator(s)
<p> <b>Short-Term Outcome</b></p> <p><b>Improved efficiency and effectiveness of the judicial system</b></p>	<p>✔ Average expert assessment score of the courts' access to material resources needed to consult the law, record proceedings, schedule cases and store and maintain records</p> <p><i>Data source</i> Project M&amp;E system: expert surveys conducted at the beginning and end of project implementation</p>
	<p>✔ Average expert assessment score of the Prosecution's material resources for record testimonies, store and maintain evidence, and keep track of pending cases and hearing dates</p> <p><i>Data source</i> Project M&amp;E system: expert surveys conducted at the beginning and end of project implementation</p>
	<p>✔ Number of specialised chambers/courts/departments established with support of the project</p> <p><i>Data source</i> Project M&amp;E system: expert surveys conducted at the beginning and end of project implementation</p>

## Result

## Indicator(s)

✓ Average expert assessment score on the sufficiency of judges' salaries for attracting and retaining qualified judges

*Data source* At least two rounds of expert surveys as part of the project M&E system

✓ Average expert assessment score on the sufficiency of entry-level prosecutors' salaries for recruiting and retaining qualified professionals

*Data source* At least two rounds of expert surveys as part of the project M&E system

✓ Average expert assessment score on the courts' strategic planning and budgeting capacity

*Data source* At least two rounds of expert surveys as part of the project M&E system

✓ Average expert assessment score on the prosecutors' strategic planning and budgeting capacity

*Data source* At least two rounds of expert surveys as part of the project M&E system

✓ Average expert assessment score on the effectiveness of the courts' administrative systems

*Data source* At least two rounds of expert surveys as part of the project M&E system

✓ Average expert assessment score on the effectiveness of the prosecutors' administrative systems

*Data source* At least two rounds of expert surveys as part of the project M&E system

✓ % of court records on pending cases that include at a minimum the date the case was transferred to the court, the charge(s) involved and the date of the next hearing or other action

*Data source* Field data gathered by UN (survey of a random sample of court records on pending cases – conducted at a minimum in the inception and final phase of the project)

✓ % of prosecution records that are apparently complete in the following categories: (a) cases accepted for prosecution, (b) cases dismissed, and (c) charges for each case

*Data source* Field data gathered by United Nations field personnel (survey of a sample of prosecution records – conducted at a minimum in the inception and final phase of the project)

✓ Number of pending cases in courts – first instance per 100 inhabitants (disaggregated by type of case: civil, commercial, administrative and other)

*Data source* Judiciary statistics in State of the Judiciary reports

✓ Average score of expert perception of undue delays in the hearing and conclusion of criminal cases

*Data source* At least two rounds of experts surveys as part of the project M&E system

✓ Percentage of citizens who fully or partly agree that the courts complete criminal proceedings without any unnecessary delay

*Data source* At least two rounds of public surveys as part of the project M&E system

Result	Indicator(s)
	<p>✔ Clearance rate (disaggregated by different type of cases, e.g. administrative, commercial, civil, etc.)</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Calculated or measured disposition time – number of days required to close a pending case (disaggregated by different type of cases, e.g. administrative, commercial, etc.)</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Total backlog rate (disaggregated by category or type of cases)</p> <p><i>Data source</i> Public sector administrative data (may require a specialized study to be commissioned by the project – at least twice during implementation in order to enable evaluation of results)</p>
	<p>✔ Proportion of unresolved cases over X days/years</p> <p><i>Data source</i> Public sector administrative data (may require a specialized study to be commissioned by the project – at least twice during implementation in order to enable evaluation of results)</p>
	<p>✔ Time from filing to disposition in cases of small financial value (disaggregated by filers' age, sex, race, ethnicity, disability, etc.)</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ The percentage of cases (appeals/original proceedings) disposed of within established time guidelines</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Percentage of cases are over-ruled or where the sentence is reduced on appeal</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Average length of time a case takes from registration to judgement (first instance only, disaggregated by category or type of cases, e.g. for criminal/civil proceedings)</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Prosecution success rates</p> <p><i>Data source</i> Public sector administrative records, e.g. office of the Director of Public Prosecutions statistics and reports</p>
	<p>✔ Annual enforcement / execution rate of decisions (disaggregated by type, e.g. criminal and civil matters)</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>

Result	Indicator(s)
	<p>✔ Number of enforcement agents in the judicial system</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Average length of enforcement of decisions (number of days)</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Number and percentage of cases [handled/referred/resolved*] through alternative dispute resolution (ADR)</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Percentage of judges who are women [or another relevant group]</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>

Result	Indicator(s)
<p> <b>Short-Term Outcome</b></p> <p><b>Improved independence and impartiality of the judiciary</b></p>	<p>✔ Country score for judicial independence according to the Ibrahim Index of African Governance (IIAG)</p> <p><i>Data source</i> Ibrahim Index of African Governance (IIAG) Data can be explored online here and can be downloaded from here</p>
	<p>✔ Country score for judicial independence according to the Ibrahim Index of African Governance (IIAG)</p> <p><i>Data source</i> <a href="#">Ibrahim Index of African Governance (IIAG)</a> Data can be explored online <a href="#">here</a> and can be downloaded from <a href="#">here</a></p>
	<p>✔ Average expert assessment score of the courts' means to protect judges from threats, harassment, assault, assassination or intimidation</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Proportion of experts who agree that the government does not overturn judicial decisions</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Share of budget allocated to the justice sector on the implemented budget</p> <p><i>Data source</i> Government budget and report on execution</p>
	<p>✔ % of members of the Judiciary Council who are elected by their peers</p> <p><i>Data source</i> Baseline and endline assessments to be conducted by the Action</p>
	<p>✔ % of judges who have permanent tenure</p> <p><i>Data source</i> Baseline and endline assessments to be conducted by the Action</p>

Result	Indicator(s)
	<p>✔ Length of a probationary period for judges</p> <p><i>Data source</i> Baseline and endline assessments to be conducted by the Action</p>
	<p>✔ Number of transfers/dismissals of judges without their consent</p> <p><i>Data source</i> Baseline and endline assessments to be conducted by the Action</p>
	<p>✔ Existence of legal safeguards preventing the transfer/dismissal of judges without their consent</p> <p><i>Data source</i> Baseline and endline assessments to be conducted by the Action</p>
	<p>✔ Percentage of the Ministry of Justice budget compared to overall public budget</p> <p><i>Data source</i> Government budget</p>
	<p>✔ General government total expenditure on law courts (per inhabitant)</p> <p><i>Data source</i> Government budget, population data from the National Statistics Institute</p>
	<p>✔ General government expenditure on law courts as a % of GDP</p> <p><i>Data source</i> Government budget and report on GDP</p>
	<p>✔ Average expert assessment score on whether judges experience delays in receiving their salaries</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on whether prosecutors experience delays in receiving their salaries</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on whether publicly funded defence counsels experience delays in receiving their professional fees or salaries</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>

Result	Indicator(s)
<p> <b>Short-Term Outcome</b></p> <p><b>Improved prison management and detention conditions in line with human rights standards</b></p>	<p>✔ Unsentenced detainees as a proportion of overall prison population</p> <p><i>Data source</i> SDG database</p>
	<p>✔ Number of reported cases of arbitrary detention (e.g., as reported to the Working Group on Arbitrary Detention) in the reporting period</p> <p><i>Data source</i> Project M&amp;E system: baseline and endline studies to be conducted by the project</p>
	<p>✔ Number of cases of use of bail and alternatives to imprisonment</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>

Result	Indicator(s)
	<p>✔ Proportion of bail applications accepted by the court in the reporting period</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Percentage of all detainees who have been held in detention for more than 12 months while awaiting sentencing or a final disposition of their case (excluding appeals)</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Number of children in pre-sentence detention per 100,000 child population</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Average expert score on whether detention of children is used only as a last resort</p> <p><i>Data source</i> At least two rounds of public surveys as part of the project M&amp;E system</p>
	<p>✔ Percentage of sentenced children receiving a custodial sentence in reporting period</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Average duration of pre-trial detention by type of case</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Proportion of cases where pre-trial detention exceeded the legally stipulated time limit by type of case</p> <p><i>Data source</i> Administrative record</p>
	<p>✔ Percentage of all detainees who have been held in detention for more than 12 months while awaiting sentencing or a final disposition of their case (disaggregated by sex)</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Number of children in pre-sentence detention per 100,000 child population</p> <p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Extent to which the prison system adheres to the <a href="#">UNs Standard Minimum Rules for the Treatment of Prisoners</a> (also known as Nelson Mandela Rules), with regards to different aspects of prison conditions (such as prisoner's nutrition, clean water and sanitation, separate detention of male and female prisoners as well as children, family visits, quality of health care services etc.)</p> <p><i>Data source</i> Expert surveys for specific aspects of prison conditions – to be commissioned by the project</p>
	<p>✔ Percentage of pre-trial detainees who are held completely separated from convicted prisoners (disaggregated by sex)</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>

Result	Indicator(s)
	<p>✔ Number of children in detention per 100,000 child population (disaggregated by sex)</p>
	<p><i>Data source</i> Public sector administrative data to be requested and analysed by the project at least twice during the implementation period</p>
	<p>✔ Percentage of children in detention not wholly separated from adults (disaggregated by sex)</p>
	<p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Number of implemented recommendations of the National Preventive Mechanism (of UN Convention on Torture)</p>
	<p><i>Data source</i> Government and civil society shadow reports (external analysis may need to be commissioned by the project)</p>
	<p>✔ % of prison population with access to vocational education and training / medical care (disaggregated by sex)</p>
	<p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Average expert perception score on whether prisons provide food of sufficient nutritional value for the prisoners to remain healthy and strong</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert score on the quality of the prisons' clean water and sanitation installations</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Percentage of female prisoners who are held completely separately from male prisoners</p>
	<p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Percentage of female prisoners who are held completely separately from male prisoners</p>
	<p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Average expert assessment score on whether families are allowed to visit their imprisoned relatives without any kind of official or unofficial fee</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on whether the professional health care generally available to prisoners is adequate</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Percentage of prisoners who have been examined by a qualified medical professional at the time of their admission to prison (disaggregated by sex)</p>
	<p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p>
	<p>✔ Number of prisoners per prison medical personnel</p>

Result	Indicator(s)
	<p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p> <p>✔ Number of non-violent deaths per 1,000 prisoners within the last 12 months</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p> <p>✔ Average expert assessment score on the adequacy of existing mechanisms for hearing complaints registered by prisoners about their treatment in prison</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p> <p>✔ Percentage of survey respondents who fully or partly agree that agree discrimination against certain groups of prisoners is a problem in the country's prisons (disaggregated by sex)</p> <p><i>Data source</i> At least two rounds of public surveys as part of the project M&amp;E system</p> <p>✔ Percentage of children in detention not wholly separated from adults</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p> <p>✔ Average expert assessment score on whether and to what extent prisoners of all faiths and denominations are permitted to freely practise their religion</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p> <p>✔ Average expert assessment score on whether overcrowding is a serious problem in the country's prisons</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p> <p>✔ Average expert assessment score on the adequacy of facilities used to detain children</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p> <p>✔ Average expert assessment score on the adequacy of the facilities used to detain women and girls</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p> <p>✔ Average expert assessment score on the adequacy of resources for transporting inmates to court hearings</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p> <p>✔ Number of prisoners per prison officer</p> <p><i>Data source</i> Public sector administrative data to be requested by the project at least at the beginning and end of implementation</p> <p>✔ Average expert assessment score on the sufficiency of entry-level salaries of prison officers for recruiting and retaining qualified professionals</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>

Result	Indicator(s)
	<p>✔ Average expert assessment score on the adequacy of training and skills of prison officers for responding to various prison situations without excessive use of force</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on the adequacy of the prison staff's human rights training</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on the adequacy of the prison service's resources and capacity for properly training new recruits</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on the adequacy of the existing vetting process for ensuring that individuals who committed gross human rights abuses and other serious crimes are identified and prevented from serving as prison officers</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on the adequacy of the efficiency of the mechanism for regular prison inspections and for following up on the issues identified during such inspections</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on the extent to which prisons are managed in compliance with human rights standards</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on whether prison staff experience delays in receiving their salary</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on the prison service's strategic planning and efficient budgeting capacity</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system. Document review (prison strategies and budget plans)</p>
	<p>✔ Average expert assessment score on the effectiveness of the prison service's administrative systems to support key management functions such as the management of finances, assets, procurement and human resources</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
	<p>✔ Average expert assessment score on the strength of the prison service's record keeping and information management capacity</p>
	<p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>

Result	Indicator(s)
	<p>✔ Average expert assessment score on the prison leaders' ability and determination to improve the capacity, integrity and performance of the prison service</p> <p><i>Data source</i> At least two rounds of expert surveys as part of the project M&amp;E system</p>
Result	Indicator(s)
<p> <b>Output</b></p> <p><b>Legal aid schemes (in the broad sense, i.e. including legal representation) for people without financial means developed and operational.</b></p>	<p>✔ Number of people directly benefitting from legal aid programmes supported by the EU (disaggregated by sex, age and disability/social group, and type of case: criminal, civil or administrative)</p> <p><i>Data source</i> Project M&amp;E system: database of direct beneficiaries (disaggregated by sex, age and disability/social group)</p> <p>✔ Number of people who were able to access justice thanks to EU support (disaggregated by sex, gender, age, disability, as well as type of support provided)</p> <p><i>Data source</i> Project M&amp;E system – database of beneficiaries to be established by the project (disaggregated by sex, age, disability, as well as type of support)</p> <p>✔ Number of LAS Advocates and legal aid providers trained who can demonstrate increased knowledge in the relevant areas (disaggregated by sex, training topic, duration and location)</p> <p><i>Data source</i> Project M&amp;E system: (disaggregated by sex, training topic, duration and location)</p> <p>✔ Number of people reached through public campaigns on legal aid [who can demonstrate increased knowledge of the relevant legal aid topics]</p> <p><i>Data source</i> Project M&amp;E system: for measuring campaign reach: listenership of radio/TV programme and number of event participants For assessing level of knowledge before and after the campaign: two specialized surveys of target communities</p> <p>✔ Number of cases referred to/processed through alternative dispute resolution provided by the project</p> <p><i>Data source</i> Project M&amp;E system – database of referrals disaggregated by sex, location, case topic and outcome of alternative dispute resolution</p>
Result	Indicator(s)
<p> <b>Output</b></p> <p><b>Strengthened capacity of individuals and CSOs to scrutinise institutions' performance and support individuals in claiming and defending their rights (e.g. through awareness-raising and advocacy campaigns, legal advice, monitoring of trials, etc.).</b></p>	<p>✔ Number of CSO representatives trained by the project who can demonstrate increased knowledge in the relevant areas (disaggregated by sex, training topic, duration and location)</p> <p><i>Data source</i> Project M&amp;E system: a. – database of training participants (disaggregated by sex, CSO, training topic, duration and location) b. database with results of pre- and post- training tests</p> <p>✔ Number of CSO coalitions established/strengthened by the project</p> <p><i>Data source</i> Project M&amp;E system – database of CSO coalitions</p> <p>✔ Number of CSOs supported by the project in organizing an advocacy event or publishing advocacy material on the justice sector's independence, impartiality or accountability (including budget tracking and other monitoring activities)</p>

Result	Indicator(s)
	<p><i>Data source</i> Project M&amp;E system – database of event participants (disaggregated by sex and location), reports or links to online advocacy material produced by CSOs with project support</p> <p>▶ Number of people reached through CSO awareness campaigns to inform the public of their rights</p> <p><i>Data source</i> Project M&amp;E system: a. listenership statistics to be obtained by the project team for radio/TV programmes they broadcast, b. database of event participants (disaggregated by type, date and location of event, date, as well as sex of participant)</p>
Result	Indicator(s)
<p> <b>Output</b></p> <p><b>Promoted access to legal information for the public (e.g. about the justice system in general, court fees, how to initiate a claim, etc., through bulletin boards, leaflets, websites and media)</b></p>	<p>▶ Number of /Status of official internet sites/portals/leaflets developed by the action to provide information about the justice system/free legal aid</p> <p><i>Data source</i> Project M&amp;E system</p> <p>▶ Number of individual website visitors on portals developed by the action to provide information about the justice system/free legal aid</p> <p><i>Data source</i> Project M&amp;E system</p> <p>▶ Number of downloads of leaflets developed by the action to provide information about the justice system/free legal aid</p> <p><i>Data source</i> Project M&amp;E system</p>
Result	Indicator(s)
<p> <b>Output</b></p> <p><b>Improved capacities of justice actors to meet the justice needs of the population (e.g. support to the revision/optimisation of the judicial map/ geographical coverage/ of courts, funding of mobile courts, set up of front desks in courts etc.)</b></p>	<p>▶ Number of policies/ regulations/ legislations on the demarcation of courts [developed/amended/adapted/ implemented *] supported by the project</p> <p><i>Data source</i> Policies/regulations/legislation before and after changes</p> <p>▶ Number of courts deployed and/or supported in under-served (or poor) regions by this project (disaggregated by type of court and location)</p> <p><i>Data source</i> Project M&amp;E system – list of courts disaggregated by location and type of court</p> <p>▶ Number of people provided with access to court as result of project-supported [mobile*] courts (disaggregated by sex, age, disability, location and type of case)</p> <p><i>Data source</i> Project M&amp;E system –database of beneficiaries (disaggregated by sex, age, disability, location and type of case)</p>
Result	Indicator(s)
<p> <b>Output</b></p> <p><b>Promoted access to legal information for professionals (e.g. legal databases and publications, publication of relevant case law, websites, statistics, etc.)</b></p>	<p>▶ Number of legal professionals with access to legal information thanks to the project (disaggregated by sex)</p> <p><i>Data source</i> Project database of beneficiaries</p> <p>▶ Number of legal professionals trained by the action to use new sources of legal information (i.e. journals, databases), disaggregated by sex</p> <p><i>Data source</i> Database of training participants (disaggregated by type and sex of official, training topic, duration and location)</p>

Result	Indicator(s)
<p> <b>Output</b></p> <p><b>Increased capacities of different justice actors to develop and enforce codes of ethics and professional conduct (e.g. support to drafting of code of ethics and professional conduct, support to judicial inspections etc.)</b></p>	<p>✔ Number of professionals from the justice sector (judges, prosecutors, lawyers etc.) who have received deontological training and can demonstrate increased knowledge in the relevant areas (disaggregated by type and sex of official, specific training topic, duration and location)</p> <p><i>Data source</i> Project M&amp;E system: a. database of training participants (disaggregated by type and sex of official, training topic, duration and location) b. database with results of pre- and post- training tests</p>
	<p>✔ Status of internal procedures within prosecution services to assess and monitor compliance with departmental performance guidelines</p> <p><i>Data source</i> Procedures document that the project helped develop and analysis of key elements in progress reports</p>
	<p>✔ Status of performance guidelines for monitoring performance of courts that hold judges accountable for unnecessary delays in proceedings, case backlog, or absenteeism</p> <p><i>Data source</i> Guidelines document that the project helped develop and analysis of key elements in progress reports</p>

Result	Indicator(s)
<p> <b>Output</b></p> <p><b>Increased capacities of different justice actors to develop and enforce codes of ethics and professional conduct (e.g. support to drafting of code of ethics and professional conduct, support to judicial inspections etc.)</b></p>	<p>✔ Amount of material resources (in EUR or specific items) delivered through the project to the courts to consult the law, record proceedings, schedule cases, and store and maintain records (disaggregated by type of resource, beneficiary institution, location, date)</p> <p><i>Data source</i> Project M&amp;E system – list of resources provided by the project, disaggregated by type of resource, beneficiary institution, location and date</p>
	<p>✔ Number of judges/courts protected with EU support from threats, harassment, assault, assassination or intimidation</p> <p><i>Data source</i> Project M&amp;E system – list of means provided by the project (disaggregated by type, location, date/duration)</p>
	<p>✔ Number of prosecutors' offices equipped by the project to record testimonies, store and maintain evidence, and keep track of pending cases and hearing dates</p> <p><i>Data source</i> Project M&amp;E system – list of resources provided by the project, disaggregated by type of resource, beneficiary institution, location and date</p>
	<p>✔ Number of registry clerks and administrative staff trained by the project who can demonstrate increased knowledge in relevant topics (disaggregated by sex, training topic, duration and location)</p> <p><i>Data source</i> Project M&amp;E system: a. database of training participants (disaggregated by sex, training topic, duration and location) b. database with results of pre- and post- training tests</p>
	<p>✔ Number of judiciary staff (prosecutors, judges, court clerks), prison officers, law enforcement officers and other legal officials trained by the project in the penal system and civil justice who can demonstrate increased knowledge in the relevant areas (disaggregated by sex, training topic, duration and location)</p> <p><i>Data source</i> Project M&amp;E system: a. database of training participants (disaggregated by sex, training topic, duration and location) b. database with results of pre- and post- training tests</p>

Result	Indicator(s)
	<p>✔ Number of guidelines, policy notes and regulations for improved court administration and case / file management developed / implemented with support of the project</p> <p><i>Data source</i> Project M&amp;E system – text of guidelines, policy notes or regulations; reports on implementation</p>
	<p>✔ Number of staff from prosecution and investigation services trained with support of the project in various specialisations of interest (e.g. gender-based violence, economic crimes, etc.) who can demonstrate increased knowledge in the relevant areas (disaggregated by type and sex of participants, duration, topic and location of training)</p> <p><i>Data source</i> Project M&amp;E system: a. database of training participants (disaggregated by type and sex of official, training topic, duration and location) b. database with results of pre- and post- training tests</p>

Result	Indicator(s)
<p> <b>Output</b></p> <p><b>Established mechanisms/ platforms for improving cooperation and coordination between justice actors (e.g. coordination arrangements between prosecution and courts with respect to organisation of criminal hearings, joint training between investigators and prosecutors, etc.)</b></p>	<p>✔ Number of mechanisms e.g. Memorandum of Understanding, periodical coordination meetings, new policies / regulations on specialised courts, to improve [cooperation / coordination / efficiency*] [developed / adopted / implemented*]</p> <p><i>Data source</i> Project M&amp;E system: text of MoU/policy the project supported, or minutes of coordination meetings the project organized, including the list of participants</p> <p>✔ Status of process or structured dialogue between lawyers and courts as regards the way cases are presented before courts</p> <p><i>Data source</i> Project M&amp;E system Official reports on the structured dialogue process</p>

Result	Indicator(s)
<p> <b>Output</b></p> <p><b>Developed or revised legal framework for civil, criminal and administrative proceedings in line with international best standards (e.g. revision of relevant codes etc.)</b></p>	<p>✔ Number of supported policies / legislation to improve efficiency within the justice sector [developed/ revised/ implemented*] (report separately for policies/ legislations specific related to juveniles)</p> <p><i>Data source</i> Expert assessment as part of the Project M&amp;E system, text of draft law/amendment</p> <p>✔ Status of special jurisdictions and detention system for juvenile crime in line with international standards</p> <p><i>Data source</i> Public records, project M&amp;E system – specifically an assessment to be conducted as a minimum at the beginning and end of the project</p>

Result	Indicator(s)
<p><b>Output</b></p> <p><b>Developed legal and regulatory frameworks related to individual independence and impartiality of judges and prosecutors (e.g. merit-based methods of appointment and promotion, security of tenure, financial security, fair disciplinary proceedings, set up of self-governing bodies, etc.)</b></p>	<p>✔ Status of law/regulation supported by the project to provide a guaranteed tenure for judges (or prosecutors, please specify) who are appointed for fixed terms</p> <p><i>Data source</i> Document review: new law/regulation and analysis of key elements by the project</p>
	<p>✔ Status of regulation/law supported by the project for the merit-based selection/appointment of judicial officers</p> <p><i>Data source</i> Text of the law/regulation and analysis of key elements by the project</p>
	<p>✔ Status of the regulation/law supported by the project on the protection of judges (or prosecutors, please specify) from arbitrary removal or punishment</p> <p><i>Data source</i> Text of the law/regulation and analysis of key elements by the project</p>
	<p>✔ Status of regulations on safeguards regarding the transfer/dismissal of judges (or prosecutors, please specify) without their consent (irremovability)</p> <p><i>Data source</i> Text of the law/regulation and analysis of key elements by the project</p>
	<p>✔ Number of staff trained to supervise a merit-based recruitment exam for judicial officials (disaggregated by sex and category: administrative or judicial staff)</p> <p><i>Data source</i> Database of training participants</p>
	<p>✔ Status of legislation on the composition of the Council for the Judiciary according to the nomination process</p> <p><i>Data source</i> Project progress reports</p>
	<p>✔ Status on legislation on the powers of the Councils for the Judiciary</p> <p><i>Data source</i> Project progress reports</p>

Result	Indicator(s)
<p><b>Output</b></p> <p><b>Developed legal and regulatory framework on the system of judicial self-administration in line with the principle of the separation of powers</b></p>	<p>✔ Number of laws/regulations supported by the project operationalising the system of judicial self-administration in line with the principle of the separation of powers</p> <p><i>Data source</i> Project progress reports</p>
	<p>✔ Number of government/judicial/ parliamentary staff trained on the importance of separation of powers and good practices in this field is increased (disaggregated by sex and branch: executive, parliamentary, judicial)</p> <p><i>Data source</i> Database of training participants (disaggregated by sex, branch, location and duration of training)</p>
	<p>✔ Number of government/judicial/ parliamentary staff whose awareness of the importance of separation of powers and good practices in this field is increased (disaggregated by sex and branch: executive, parliamentary, judicial)</p> <p><i>Data source</i> Database of pre- and post-training test results</p>

Result	Indicator(s)
<p><b>Output</b></p> <p><b>Promoted provision of adequate resources to justice sector</b></p>	<p>Number of justice sector actors representatives trained by the action on resource management (or another topic, please specify), disaggregated by sex, institution, training topic, location, duration</p> <p><i>Data source</i> Database of training participants (disaggregated by sex, institution, training topic, duration and location)</p>
<p><b>Output</b></p> <p><b>Developed or revised penitentiary legal and regulatory framework in line with international best standards (e.g. set up of a specialised body of prison guards, revision of prison conditions, etc.)</b></p>	<p>Number of probation officers trained by the project who can demonstrate increased knowledge in the relevant areas (disaggregated by sex, training topic, location and duration)</p> <p><i>Data source</i> Project M&amp;E system: a. database of training participants (disaggregated by sex, training topic, duration and location) b. database with results of pre- and post- training tests</p> <p>Status of the [development/ revision/ implementation* ](of X)</p> <p><i>Data source</i> Project M&amp;E system: progress reports</p> <p>Number of independent inspections visit of prisons carried out with project support</p> <p><i>Data source</i> Project M&amp;E system: reports on inspections the project supported</p> <p>Number of convicts benefitting from work reintegration programmes through EU support (disaggregated by sex)</p> <p><i>Data source</i> Project database of beneficiaries, disaggregated by sex</p> <p>Number of detention facilities supported by the project to achieve the UN Standard Minimum Rules for the Treatment of Prisoner</p> <p><i>Data source</i> Project's technical reports on new infrastructure, expert needs assessment reports</p> <p>Number of detention facility staff trained on the UN Standard Minimum Rules for the Treatment of Prisoner</p> <p><i>Data source</i> Training participants database (disaggregated by sex, training topic, duration and location), database of pre- and post- training scores, etc.</p> <p>Status of computerised management system used by detention institutions for transfer management</p> <p><i>Data source</i> Project M&amp;E system – progress reports</p> <p>Number of detention facilities supported by the project to provide prisoner with clean water and sanitation installations</p> <p><i>Data source</i> Project's technical reports on new water and sanitation installation and water quality</p> <p>Number of water points and sanitation facilities constructed/upgraded in supported detention facilities</p> <p><i>Data source</i> Project progress reports</p> <p>Number of detention facilities constructed or renovated by the project (disaggregated by type of facility and location)</p>

Result	Indicator(s)
	<p><i>Data source</i> Project M&amp;E system : technical reports on the construction/renovation process, list disaggregated by type of facility and location, also specifying the estimated number of detainees and staff who will use the newly constructed or renovated facilities</p> <p>✔ Number of juveniles in adult prisons supported by the project</p> <p><i>Data source</i> Project M&amp;E system: database of beneficiaries who received services with project support (disaggregated by sex and age of beneficiary, as well as the type and location of detention facility)</p> <p>✔ Number of juvenile detention centres and rehabilitation/recuperation centers for children in conflict with the law constructed/renovated by the project</p> <p><i>Data source</i> Project's technical reports on the construction/renovation of detention centres</p>

Result	Indicator(s)
<p> <b>Output</b></p> <p><b>Alternative measures to detention and imprisonment, and diversion and rehabilitation mechanisms developed and promoted (incl. for children in conflict with the law)</b></p>	<p>✔ Number of judges trained by the project to impose penalties alternative to incarceration who can demonstrate increased knowledge/use of alternative sentencing (disaggregated by sex of participants, duration, topic and location of the training)</p> <p><i>Data source</i> Project M&amp;E system: a. database of training participants (disaggregated by type and sex of official, training topic, duration and location) b. database with results of pre- and post- training tests</p> <p>✔ Number of detainees provided with VET, psycho-social support, access to healthcare (or please specify the type of support the project will provide) – disaggregated by sex, type of detention facility, location and age</p> <p><i>Data source</i> Project M&amp;E system: database of beneficiaries who received services with project support (disaggregated by sex and age of beneficiary, as well as the type and location of detention facility)</p>
