GCCA/GCCA+ IMPACT AND SUSTAINABILITY STUDY

- ◆ Increase vulnerable communities' capacities
- ◆ Empowering women in rural communities
- ◆ Sustainable use of natural resources
- ◆ Resilient exemplary eco-villages
- ◆ Best practices in different agro-eco systems

**36.9** ha of agroforestry systems established

**234.6** ha of land afforested

**754,853** tree seedlings produced

**351** Kg per acre average yields (from 234 Kg)

**38%** reduction of women and children's workload

**554** fuel-efficient cooking stoves

**104** beehives distributed

**524** community members benefit from stabilized earth block construction (ISCEB)

Community members trained in livelihood diversification, apiculture, forest management, biogas, farming techniques, construction, business planning, etc.

The "Chololo eco-village" as best practice model

**7** eco-villages (Uluguru Mountains)
