#20

GCCA/GCCA+ IMPACT AND SUSTAINABILITY STUDY

- ◆ Knowledge and capacities for climate change
- ◆ Access for livestock and crops to water
- ◆ Water for production investments
- ◆ Agricultural production resilience

5 years Strategic Plan

6 District Climate Change Task Forces

23,852 technicians and policymakers trained

Water management systems

- 15 valley tanks with a capacity of 10,000 m³
- 20 water user committees
- 38 Farmer Field School groups
- 924** households

Community-based adaptation

- 168 Farmer Field School groups
- 4,172** households

Bioenergy plantations

- 152 farmers trained
- 87.7 ha demonstration fuelwood

Coffee production adaptation practices

- 12,240 coffee farmers trained
- 400 coffee demonstration plots
- 1,220,000 elite coffee seedlings
- 80 low-cost rainwater harvesting
