

DO YOU SPEAK GLOBAL?

We encourage pupils to imagine concrete solutions for the global problems they encounter in their daily context.

It is essential that the students not only understand the global problems, but also their local implications.

It is not an exercise in style: we support them to move on from the idea to planning real solution, involving the community of reference and raising funds. We want them to experiment their role as change maker, identifying and solving a social problem within a school year.

OUR MODEL OF INTERVENTION

Teachers training on Agenda 2030
Students training on Agenda 2030

Activation of students to volunteer and community engagement
Co-planning of micro community projects with strong social impact

Realization of school crowdfunding and local events

1255
PUPILS
INVOLVED

Since 2017 we have been working in 57 classes, training students on UN Sustainable Development Goals and Agenda 2030. We emphasise their active role as global citizens.

CONVINCE ME
THAT YOUR SOLUTION
IS WORTH

This is what we ask to students, as projects are selected and financed by the school community of reference

Learn, design, raise awareness and realize your idea!

www.gofundme.com/f/un-bagno-da-sballo

A SUSTAINABLE IMPACT IS OUR PRIORITY

We transfer skills to teachers and students.

Once they understand how to identify concrete problems and solutions and how to promote them, the classes and individual students are able to replicate the experience independently.
