This is part of the series of Webinars on [“European Green Deal - Greening EU cooperation \(Environment and Climate Change\)”](#), offered by the [European Commission](#)’s Directorate General for International Partnership (DG INTPA).

20 September 2022

SAVE THE DATE

Forest-based value chains – special focus on wood products

The objective of this **interactive webinar** is for participants to gain a deeper understanding of options for strengthening the role of forests in the national economy of partner countries’ and responding to global challenges on climate change and loss of biodiversity.

What are the green value chains that forests can sustain?

How can forest-based value-chains deliver jobs, income, resilience, while halting deforestation?

Participants will gain a deeper understanding of the nature and extent of **potential wood and non-wood products that can be produced sustainably from different forests** – natural forests, planted forests and agroforestry systems – in different geographies benefitting local people and economies while maintaining forest ecosystems.
