CASE STORIES

Going Circular – National level processes towards a circular economy

The publication Going Circular covers national level processes towards a circular economy. Countries across the world have started the journey towards a circular economy. DG INTPA, supported by the SWITCH to Green Facility, explored the circular economy transition processes at a national level to produce insights on selected country experiences, fed by interviews with stakeholders including EU Delegations, national governments, the private sector and civil society. Lessons learnt and success factors were gathered to enable a better understanding of the “recipes” for replication.

Supporting the Circular Economy

The DG INTPA publication “Supporting the Circular Economy” gathers practices from the EU SWITCH programmes. It takes us to a journey across selected economic sectors, with a view to inspiring and encouraging a switch to green, notably circular, practices. Facts and figures on the environmental impact of economic activities are used to explain the challenges faced in each sector. Infographics and animated illustrations complement stories, each showcasing successful SWITCH projects with strong replication potential.

INDICATOR GUIDANCE AND RESULTS CHAINS

Circular Economy – Results chain

This guidance on Results and Indicators for Circular Economy has been developed by INTPA Unit D4 “Performance, Results and Evaluation; Internal Communication, Knowledge Management and Collaborative Methods” jointly with INTPA Thematic Units with support by the SWITCH to Green Facility. Its main objective is to enhance the quality of INTPA interventions on the Circular Economy – both in terms of design as well as of monitoring and reporting in the course of implementation.

Green Economy – Results chain

This guidance for action design is addressed to all colleagues involved in the preparation of action documents and project documents in the field of green economy. It offers a handy tool to develop solid logical framework matrices and identifies clear and measurable results statements that are in line with INTPA policy priorities, as well as with the UN Sustainable Development Goals (SDGs), along with a range of good indicators to monitor progress.

The guidance was prepared by INTPA Unit “Evaluation and Results” jointly with INTPA Thematic Units and support by the SWITCH to Green Facility.

REFERENCE DOCUMENT

Reference Document N° 25 – The inclusive green economy in EU development cooperation

Reference Document N° 25, ‘The inclusive green economy in EU development cooperation’, provides policy and operational guidance on cooperation on the green economy. It presents definitions and explains the rationale for cooperation in this area, in line with EU policies and the growing interest in partner countries. It presents the state of play of EU actions, including results achieved and lessons learnt. It also explains options to support the green economy through dedicated interventions and by integrating green economy issues across relevant sectors. Finally, it provides selected references and tools.

ABOUT THE FACILITY

The SWITCH to Green Facility – Promoting a global transition to a green and circular economy

This brochure from 2020 shows examples of how the SWITCH to Green Facility works with European Commission services and development partners across the globe. It outlines the services provided by the Facility and explains the process to access them. The publication showcases the benefits to those who have received the Facility's technical assistance. The publication is currently being updated.

SWITCH to Green – the website

The website [Switchtogreen.eu](https://www.switchtogreen.eu) provides information about the services offered by the SWITCH to Green Facility. The technical assistance facility supports circular economy action design (at both HQ and EU Delegation levels), communication and outreach on the green/circular economy transition, dialogue and coordination across EU partner countries (with events ranging from technical meetings to high-level policy debates) and provides capacity development through trainings and learning events to European Commission staff and international partners. The website offers a range of useful tools, such as guidance indicators, impact chains, and updates on policy developments in the green and circular economy. Moreover, the website shares publications that include case studies, evaluations, policy documents, and other reports published with the support of the SWITCH to Green Facility and the Greening Facility managed by DG INTPA.

SWITCH to Green – interactive map

The [interactive map](https://switchtogreen.eu/map-of-projects/) is conceived as a gateway providing information on green, notably circular economy-related activities (including their objectives, status, results, partners, funders and budgets) implemented with EU support. By displaying project data—such as sectors, themes, drivers for scaling up or beneficiaries – the map tells the interrelated stories about the progress of the transition to green, notably circular economy. Projects can be searched using keywords or using pre-set filters.
