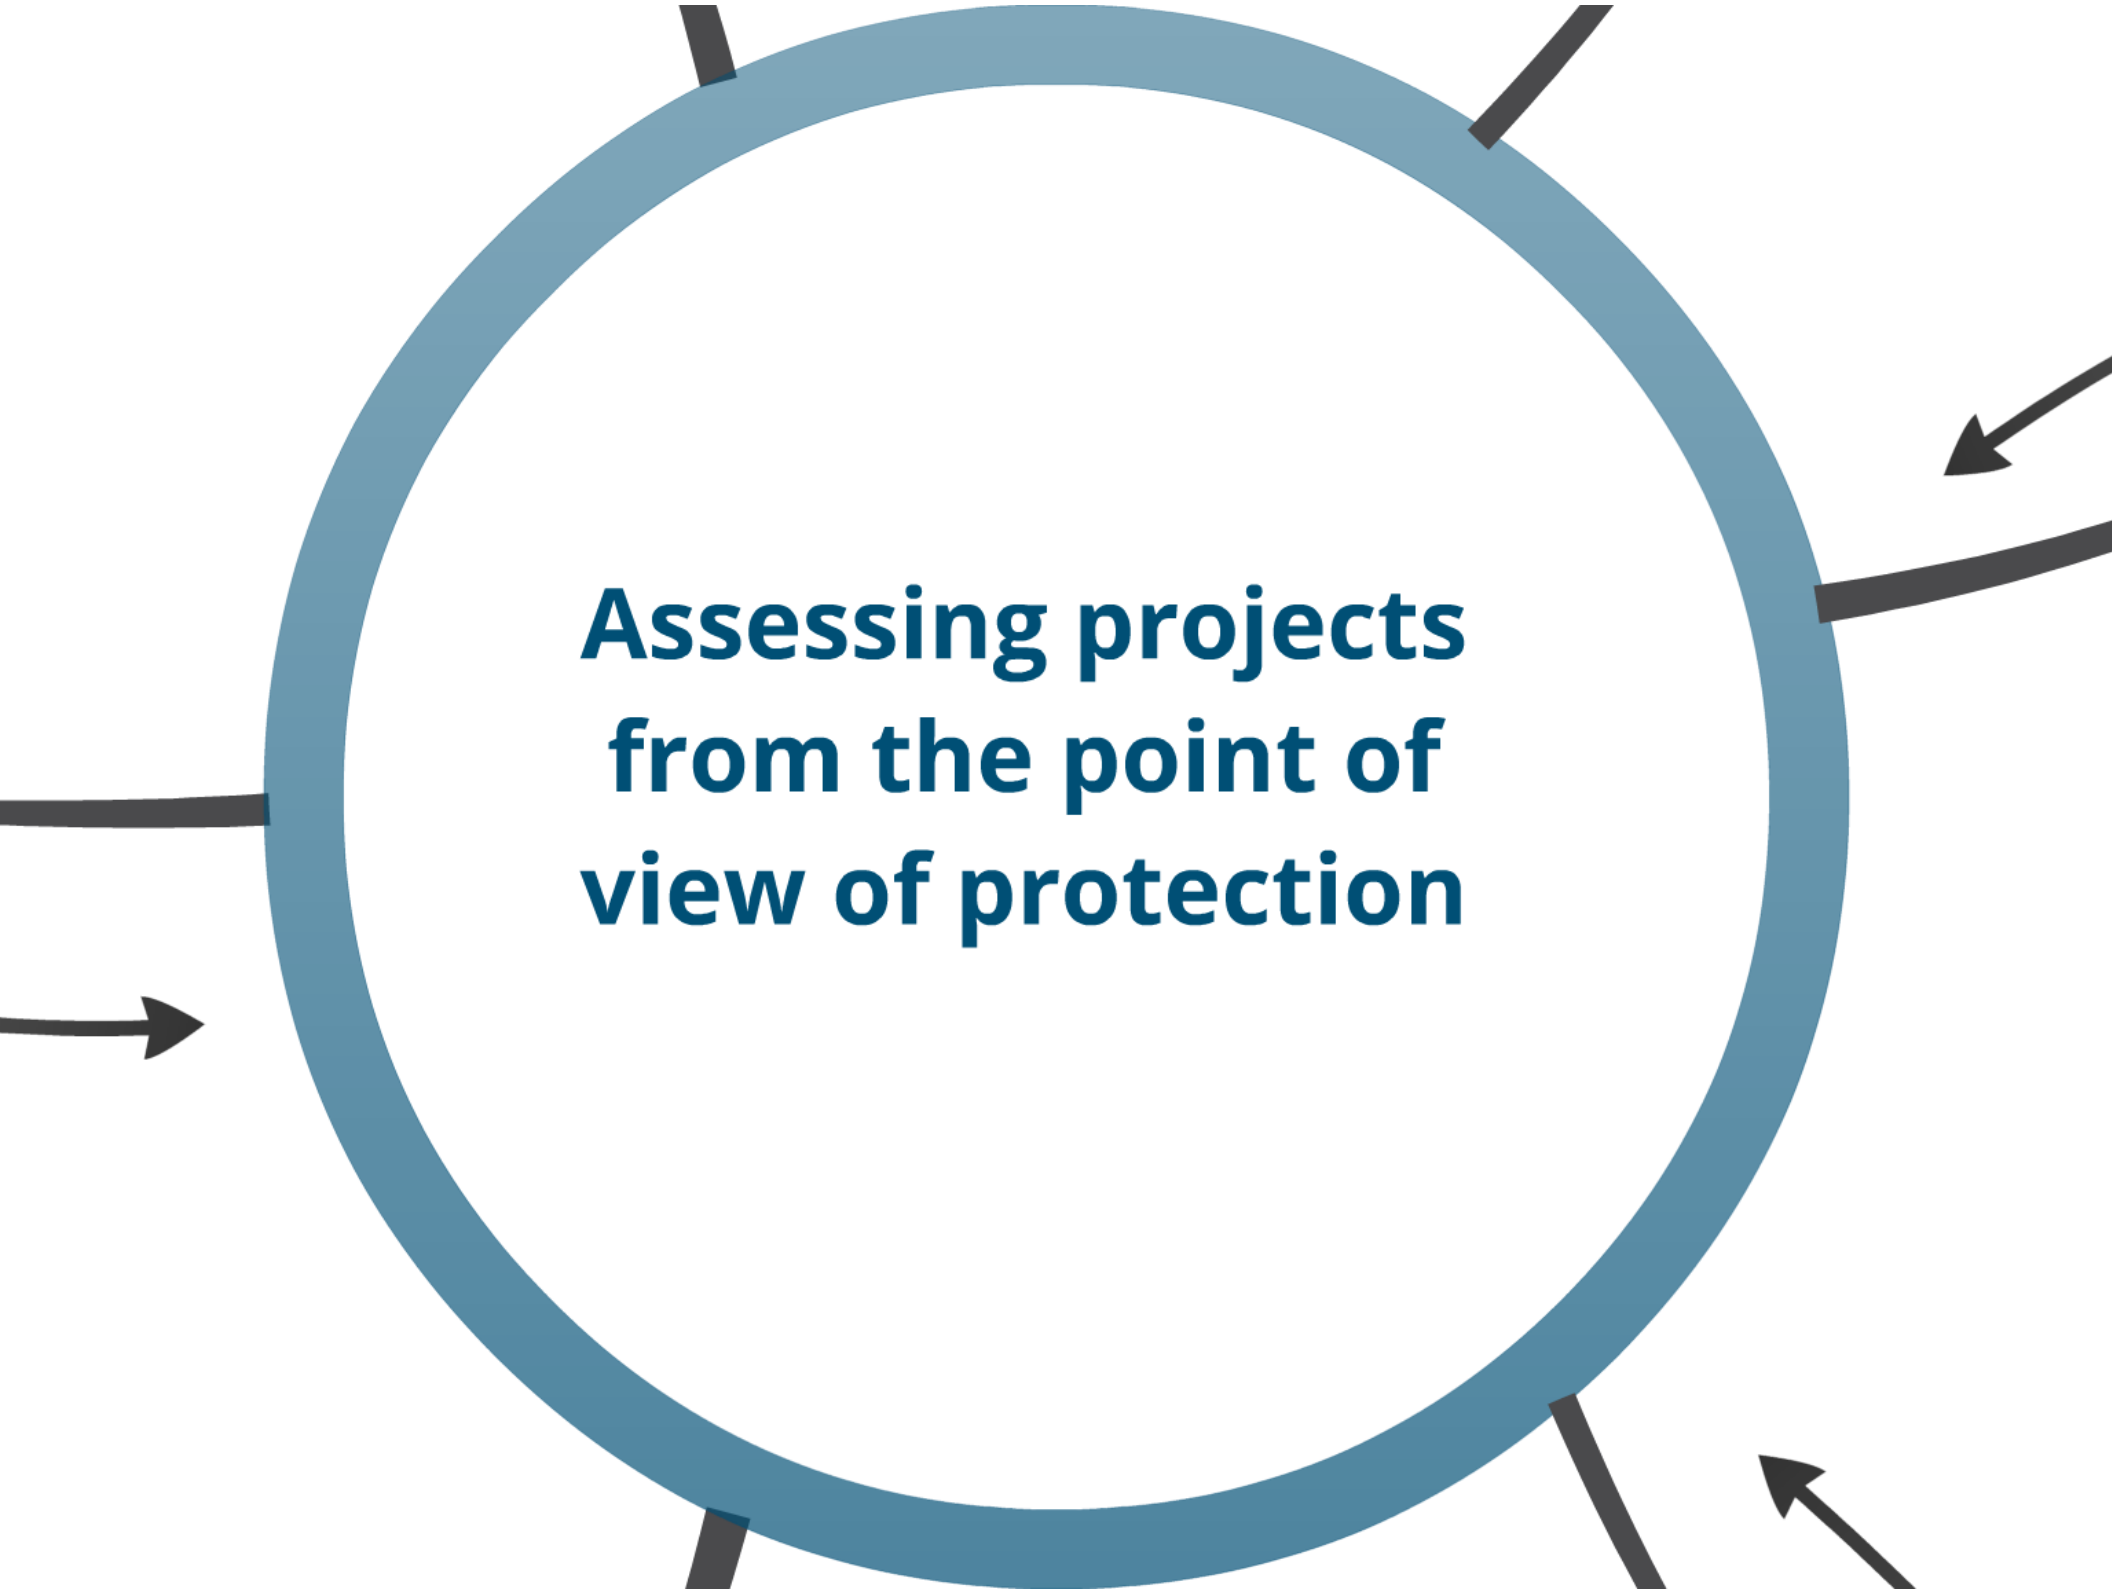
Assessing projects from the point of view of protection
Normative frameworks: they inform decisions in protection (for example: protection needs)
Classification of stakeholders:
-Primary stakeholders
-Duty bearers stakeholders
-Key stakeholders
Risk assessment as an entry point for action:
-Threats (against beneficiaries)
-Vulnerabilities and capacities (of beneficiaries)
Context assessment:
-Stakeholders mapping
-Stakeholders matrix
-Field of forces
Looking at protection in the wider humanitarian ecosystem:
Protection work according to the kind of response
Protection work according to the relationship with duty-bearers
Now that we have all the relevant information... Let's assess projects from the point of view of protection



Assessing projects
from the point of
view of protection
