

Capacity Building to roll out PIDA

Bringing sustainability to infrastructure development

Distinct roles for distinct actors requires tailored approach

Overall objective: sustainability in planning, coordination and implementation of PIDA PAP programmes

AUC

Integrated communication and policy analysis frameworks

Mobilising domestic funding

NPCA

Strong Monitoring and Evaluation framework, in close partnership with RECs

Up to date project information

Countries & RECs

Capacity to diagnose and monitor implementation bottlenecks and apply remedial actions.

Some ongoing initiatives in infrastructure sector

EU

Support to AUC

Joint programmes, notably in Energy

Interventions on trade corridors, OSBP

GIZ

Support to PIDA
IAIDA

Strengthening of
AUC & NPCA

EU, DFID,
IsDB, AfDB

(KfW)

Opportunities for EU interventions monitored through EU-Addis delegation

Continental
agenda
setting

- Continued support to AUC

Regional
Coordination

- Technical Assistance to Specialized institutions, notably Power Pools and River Basin Organizations

Country level
implementation

- Support to national or project specific entities through Technical Assistance (EDF) or project grants (EU-ITF and others)
