

European Year for Development 2015

Our World, Our Dignity, Our Future

An online group has been set up on Capacity4dev for the European Year for Development (EYD) 2015 stakeholders. It is intended as an **informal and open channel** for communication among EYD2015 stakeholders, a **collaborative working space**, and a **hub for exchanges** on how to work together in the lead-up to and throughout 2015.

In the group you can also find useful information and documentation from the EYD2015 team.

Connecting the Development Community

Capacity4dev is the knowledge-sharing platform of DG EuropeAid, available to development practitioners to access and share knowledge about development policies, practices and projects.

Launched in 2009 it now has over 10,000 members including staff from EuropeAid and other European Commission (EC) directorates, the European External Action Service (EEAS), European Union (EU) member states, partner governments, civil society, international organisations, academia and the private sector.

Groups

Members of Capacity4dev can request membership to public and restricted groups where they can work together online sharing documents, writing blogs and comments, promoting events, and sharing the content of important workshops. Many groups are available for anyone to join covering most of the topics and areas that the EU works in; for some others access is limited to EC/EEAS staff, EU MS officials, or is by invitation only.

The groups enable Capacity4dev members to collaborate and share their knowledge, lessons learned and expertise in an open space. **All posts express the members' personal views and opinions, and not the position of their respective organisations.** This is to encourage interaction.

Topics

There are currently 29 topics on capacity4dev.eu covering most areas of EU development cooperation and external policy. You can use these pages as a thematic entry point to the groups and content on the site.

People

Each capacity4dev.eu member has their own profile page featuring their latest activity and a personal contact form. You can search through members, to find and interact with development experts and practitioners working on similar topics to you.

Voices & Views

Published weekly, "Voices and Views" are front page articles providing the viewpoints of specialists, to enhance the quality of aid, development policy and capacity development.

There are now over 350 of these, most of which contain video interviews, forming a treasure trove of expert insight and opinion on policy developments, how to use EC tools, and advice to colleagues.

Projects

Building capacity starts through learning from one another's experiences throughout the lifecycle of a programme or project. Showcasing specific projects can help us learn about best practices, give insights on ways of collaborating, or even share practices to avoid.

The Project functionality provides a space where members can learn from one another's experiences, while interacting through comments.
