AFRETEP Project:

Atelier du Projet AFRETEP pour la Région Afrique de l'Ouest

Le Centre Commun de Recherche de la Commission Européenne recherche des candidats pour participer à l'atelier de formation sur l'application de l'énergie renouvelable à l'électrification rurale.

L'initiative est financée par *EuropeAid Development and Cooperation*, Direction Générale de la Commission Européenne.

L'atelier de la Région Afrique de l'Ouest aura lieu à Ouagadougou (Burkina Faso), du 7 au 11 novembre 2011, à la Fondation 2iE. La langue officiel du cours est le français, la traduction de/ vers l'anglais sera fournie.

Veuillez trouver, ci-joint, l'appel à candidature.

AFRETEP Project:

Western Africa Region AFRETEP project workshop

The Joint Research Center of the European Commission is seeking candidate trainees for the Western Africa Region workshop on the application of the renewable energy to rural electrification.

The Western Africa Region workshop will take place in Ouagadougou (Burkina Faso), from November the 7th to 11th, 2011, at the 2iE Foundation. The working language are French and English (translation will be provided).

Please, find attached open call.

20/09/2011

AFRETEP Project:

Eastern Africa Region AFRETEP project workshop

Due to administrative reasons, the expected 15 to 19 August Eastern Africa Region AFRETEP project workshop has been postponed.

The workshop will take place in Kampala (Uganda), from the 3rd to 7th October 2011, at the Centre for Research in Energy and Energy Conservation (CREEC) of Makerere University.

Trainees selection procedure is closed.

CPS Today of London:

Utility Scale PV growth takes centre stage in the US

Two weeks ago the American solar company Solyndra declared bankruptcy, with the subsequent FBI investigation into their misuse of federal loans clearly damaging the image of photovoltaic manufacturing in the USA. However, despite the immediate publicity surrounding this scandal it is hard to agree that the bankruptcy of Solyndra will overshadow the growing utility-scale PV market in the United States ... CPS Today of London:

Independence day for thin film: can it support itself without subsidies?

Although the case of Solyndra is being held up against the thin film industry, the DOE have continued to demonstrate their confidence in the technology. In August this year a \$197 million loan guarantee was granted to SoloPower for a manufacturing facility that U.S. Energy Secretary Steven Chu announced would create around 450 permanent jobs and 270 construction jobs ... The prospect for CSP in the Spanish market – boom or bust?

Hopes are high for CSP in Spain. The **CSP Markets Report 2011-2012** describes in detail how the Ministry of Industry has granted permission for the construction of 61 plants in 11 provinces, mainly in the south. 21 are currently operational with an installed capacity of 852.4MW, with 40 further plants under construction, pre-assigned and pending construction. When all plants have entered service in 2014, the country will have 2525.3MW CSP capacity ... [read more](#).

CPS Today of London:

Evolution and new opportunities for CSP

As the world re-defines its energy generation mix, CSP could provide 11.3% of global electricity by 2050. But the next two years are critical if market volume is to reach €23 bn in 2020 as predicted, and if the 89 planned plants in 16 countries are to achieve their multi-GW capacity ... [read more](#).

Cost Effective PV Operations and Maintenance Strategies

London, 30 Aug 2011, PV Insider
With an industry growing at such a rate it becomes a concern to protect the PV investments and ensure they continue to perform over their 20 year life span. This is even more evident in the utility scale solar market, as developers face more pressure to delivering projected output as part of their Power Purchase Agreements. In today's climate plant owners are focused on maximising the return on investment, including assets such as facilities and O&M staff ... [read more](#).

AGEESE:

African Green Energy and Environment Summit & Exhibition Lagos 2011

With deep regrets, I'd like to inform you on the indefinite postponement of the African Green Energy and Environment Summit and Exhibitions that was scheduled for the 17th - 20th October 2011.

This draws from the fact that the RE industry has criticised the reasoning behind staging two major conferences in Nigeria on the same date being 17th

- 20th October 2011. Most are of the view, that the RE industry in Nigeria is still too young to have such "fierce competitors". You would recall that the other was rescheduled from the 6th - 8th of July 2011 to the present date.

We sincerely apologise for any inconveniences on your path.

Sincere Regards

Ifeoma Odeluga

19TH AUGUST NEWSLETTER

WG pages

We remind you we have uploaded some interesting information in the Working group pages frame. You could find maps and data of solar radiation and PV in Africa and Europe, of African infrastructures, of global population and further. Moreover, you could access to the Photovoltaic Geographical Information System (PVGIS) of the Joint Research Centre (JRC) of the European Commission and download processed data of the JRC GIS.

WG forums

We would remind AFRETEP members about forum discussions:

1. AFRETEP workgroup website improvement.
2. Barriers and chances for renewable energy deployment
3. Energy solutions in rural Africa: working towards a continental scale methodology?
