#GLOBALGATEWAY

#TEAMEUROPE

## TEAM EUROPE PROPOSAL

### Reduced digital gap:

- Increased digital connectivity to underserved areas
- Improved access to e-services (FR, DE, EU)

### Digital Upskilling / Technical and Vocational Education and Training (DE, EU)

### Digital Land Governance

### Leapfrog digital economy transformation:

- Digital and innovation ecosystems, business and job creation
- Emerging technologies and socio-economic benefit
- Digital policy development and digital economy (DE, EE, SE, EU)

### Digitalisation of SME's and value chains

### Open and inclusive digital governance:

- Improved transparency, accountability and access to justice
- Inclusive online public service delivery at national and local level
- Secure and open e-government systems and standards
- Democracy promoted and protected in the digital environment (DE, EE, SE, EU)

## MODALITIES/TOOLS

Diplomacy/policy dialogue

Private investments

Access to finance

Civil society cooperation

Grants, Blending, Guarantees

Research, innovation, digitalisation ecosystems

Studies and policy briefs

TAIEX

Technical assistance

## KEY DELIVERABLES

### Digital connectivity

- Construction of optic fibre infrastructure and last-mile connections to underserved areas: 1000 km long international connection between Kismayo (Somalia) and Dadaab (Kenya).
- Secure cable for East African coast landing in Kenya.
- Subsea digital cables linking Europe to Africa.
- Internet penetration: deployment of 4G and 5G technology.
- Construction and connection of data centres: 1500km connection of data centres in Mombasa and Kampala; upgrading of NOFBI network from Mombasa.

### Digital economy transformation & Digital Governance

- Build-up the Green Digital Innovation Hub as incubator accelerator and innovation centre for start-ups and SMEs, implemented by the Digital Transformation Centre
- Office of the Data Protection Commissioner fully operational in line with EU standards
- Fully-fledged customer care centre at the Ministry of Lands, digital registries and delivery of 300,000 land title deeds
- Open and integrated e-government systems and standards operational for online public service delivery.

\*This Team Europe Initiative is work in progress

## POTENTIEL DE TRANSFORMATION

- Reducing digital divides between women and men, young and old, and urban and rural areas.
- Reduce corruption and improve public services, healthcare, education and governance,
- Promote professional skills, businesses, infrastructure and agriculture

- Skills development for youth
- e-education
- e-health
