## LESSONS LEARNT

**EXPAND YOUR COLLABORATION WITH A WIDE RANGE OF EXPERTS** already at the project design level. Include other organisations, institutions, the private sector, and universities. Your project needs to be seen in a broader context, as it can be the starting point for other initiatives.

**BE OBSERVANT, FLEXIBLE, AND ADJUSTABLE.** It's extremely important to give yourself the time to understand the context of the project and be receptive to constantly changing needs and regional trends (political, economic, etc.). Revising objectives while implementing a project can optimise its impact and long-term sustainability.

**KEEP COMMUNICATION CHANNELS OPEN AT ALL TIMES** to ensure that stakeholders' expectations and community needs are met and well managed at all times.
