## PRACTICAL TIPS

- ✎ **The so-called '5 Ps' - Partnerships, Prosperity, People, Peace, and Planet, are still relevant and should continue to be used in cooperation efforts.** This framework provides a strong foundation for international cooperation efforts and it remains highly relevant in addressing today's challenges.
- ✎ **Change is inevitable, but we need to be open to it while addressing new challenges and opportunities for growth.** International cooperation is dynamic and ever-changing: from the Lomé Convention to today's Green Deal and Global Gateway strategies, we have been constantly adapting with flexibility and responsiveness. Adaptability is key to long-term success.
- ✎ **Don't underestimate the power of knowledge-sharing and collaboration.** Knowledge exchange is fundamental in international cooperation, and platforms like Capacity4dev play a crucial role in facilitating information sharing among colleagues and partners by creating communities of practices where professionals can learn from each other. Actively engage with colleagues and partners in the field to enhance the impact of the work we do every day.
