

INTEGRATING ENVIRONMENT & CLIMATE CHANGE IN EU INTERNATIONAL PARTNERSHIPS

The EU Greening Facility provides both remote and on-site assistance to maximise every effort to integrate the environment and climate change in EU cooperation aiming at transformational change towards environmentally sustainable, low carbon and climate resilient development.

HOW CAN WE HELP YOU?

Raising awareness

We seek to increase the understanding of EU staff and partners regarding the critical importance of contributing to the green transition and guide colleagues to deliver on this shared responsibility.

Capacity building

We help build capacities of EU staff and partners to make the most of opportunities to contribute to the green transition, through training, knowledge sharing and other capacity development activities.

Tracking financial flows

Our team ensures a rigorous monitoring and reporting of financial contributions to climate action, biodiversity, combating desertification, environment and disaster risk reduction.

Reviewing actions

We offer technical guidance and advice to support the design of actions, budget support programmes and investments to enhance the achievement of a green transition, ensure adherence to the Do No Harm principle and maximise contributions to climate and biodiversity spending targets.

Development of guidance material

We create and promote tools to green EU partnerships.

Technical assistance (Helpdesk)

We provide remote and on-site support for greening EU cooperation across the whole cycle of operations for programmes, projects and investments.

TOOLS AND METHODS

Access the tools that can aid in greening the EU's external actions.
