

Biomass & Bioenergy Expert

SHORT INTRODUCTION

Carla de Carolis

International Biomass Expert

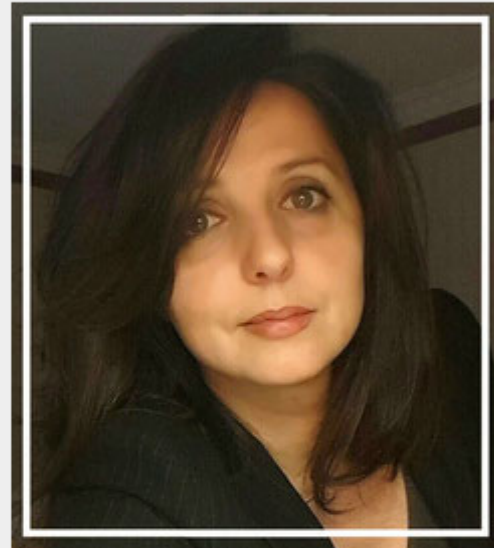

Carla de Carolis is an International Expert in the Biomass and Bioenergy Sector.

Her international activities are primarily focused on EU projects relating to:

- *Sustainable biomass analysis* to support energy strategy planning for Governments,
- *Renewable Energy Implementation*,
- *R&D innovation technologies* for a better exploitation of the RES, with focus on the biomass and bioenergy sector.

She's used to working in international context in order to give strong contribution as technical assistance for RES development in Energy Policy of Developing Countries.

Her main business is focused in the Analysis >> Planning >> Integration >> Implementation on large scale of "RES - Renewable Energy Sources_Biomass" by using sustainable approaches.

Carla de Carolis, PhD.

Clients

She is collaborating for different public and private international institutions, such as:

[Adetefe](#)
[MRC](#)
[ITABIA](#)
[UNIVPM](#)
[EUKNOW](#)
[CTI](#)

She is also collaborating with companies working in the Advanced Biofuel sector by UCO - Used Cooking Oils, in close collaboration with [EWABA](#) - *European Waste Advanced Biofuels Association*.

She worked for [DG Research & Innovation Infrastructures of the EU Commission](#) as Reviewer of research project focused in "*European Research Infrastructure for Thermotechnical Biomass Conversion*", [FP7 - EU Funding Programme].

Projects & Publications

For the last 10 years she has cooperated with other international partners, for the implementation of several European Projects related to Biomass and bioenergy sector, such as:

1. TARES Project: [EuropAid], 2014-2015.
2. ENER SUPPLY Project: [SEE], 2010-2013.
3. FOREST Project: [IEE], 2010 - 2012.
4. MAKE it BE Project: [IEE], 2008 - 2011.
5. RADAR Project: [IEE], 2007 - 2009
6. BioForEnergy Project: [INTERREG] 2006 - 2008.

Awards

After a full University Degree in Agricultural Science and Technology (5 years), the Ph.D. on "*LCA - Life Cycle Analyses of the bioenergy chains by rural residues*" granted by [University Polytechnic of Marche](#) (2006).

During the Ph.D. she's got a [European Marie-Curie Fellowship](#) for project in biomass co-firing systems at [IFRF](#) - International Flame Research Foundation carried out in the Netherlands.
