

SUSTAINABLE ENERGY FOR SIDS

Start: 9 January 2017

7 weeks | free online course

Register at www.project-l3eap.eu

Why are energy access, security and efficiency so important for Small Island Developing States (SIDS)?

How can SIDS improve their sustainable energy production and use?

Join the online course, learn more about small islands and their specific energy-related needs and constraints – and collaborate with learners from around the world.
