

Towards Sustainable Development — Greening EU Development Cooperation

Module 3: Integration in Programming

Entry points and actions

ENTRY POINT		KEY ACTION
1. Country situation analysis		<ul style="list-style-type: none"> Analyse the country environment
		<ul style="list-style-type: none"> CEP
2. Drafting the programming documents		<ul style="list-style-type: none"> Integrate the environment and climate change in the Programme Note the specific environment/climate change assessment tools to be applied during identification and formulation and/or implementation Include indicators in the intervention framework that capture key environmental and climate change concerns
		<ul style="list-style-type: none"> CEP
		<ul style="list-style-type: none"> Include the environment and climate change in the policy dialogue agenda Engage the government and key stakeholders, including civil society

A key point here is to integrate the environment and climate indicators in the MIP

3

CEP – Country Environmental Profile

- Summary
- State of the environment
 - inputs for the “analysis of the environmental situation” in MIP
- Environmental policies, legal and institutional framework
- Implications of climate change
- EU and other donors’ co-operation from an environmental perspective
- Conclusions and recommendations
 - to be considered in the design of the response strategy

Note: CEP can be updated to inform ongoing implementation - ahead of mid-term review
