Opsys

EU external action at your finger tips

International Cooperation and Development

Leveraging excellence in EU external relations

Opsys is a large-scale business transformation and IT programme, a knowledge-sharing platform to effectively and efficiently manage the whole EU external relations (DEVCO, NEAR and FPI) portfolio of projects and programmes. Opsys means a shift of mentality in the way EU aid works, a more transparent and results-based way of delivering co-operation. It represents a quantum leap forward in terms of improved procedures harmonized processes and a modern IT tool.
Opsys' goal is to raise the effectiveness and visibility of EU co-operation.

ACTIONS

- Steering programmes
- Monitoring outputs
- Achieving results
- Aggregating information
- Harmonizing processes
- Managing contracts
    all with SMART indicators

KEY OBJECTIVES

- Effectiveness and results focus
- Increased productivity
- Increased transparency
- Knowledge sharing
- External partners involvement

INTEGRATION WITH

- ABAC
- ARES
- AUDIT
- Capacity4dev
- EAMR
- EuropeAid Atlas (GIS)
- PROSPECT
- PADOR (SEDIA)
- ROM and EVAL
- E-procurement
- Grant management

EU external action at your finger tips

Are you a Head of European Union Delegation (EUD), an operational manager in a EUD, a thematic or geographical expert, a manager in Headquarters or are you in charge of contracts and finance? Opsys will concern your work as from 2020 (for some features even earlier) for the better.

Less administration more content translates into features such as:

- one single entry point/interface that integrates all tools available
- interoperability and full automation between relevant tools
- no more re-encoding (data will be reused when needed)
- easy aggregation of results per country, region, sector

Best corporate solutions are identified in collaboration with DG DIGIT.

**Step One:
Projects and results come first**
Through a user-friendly flexible and automated system, you will be able to easily access information on projects and programmes, validate and monitor their results. You will be able to engage in collaborative work as the system will be open to external partners and will provide essential data for reporting and communication thus generating increased transparency. It will serve operational, financial, geographic and thematic staff, as well as middle and senior managers. Opsys will provide harmonised screens, personalised pages, easy search tools, guidance for encoding, real time work, mobile connectivity...
