

## GENERAL INFORMATION

### Brief Description of the project:

Along the road to Maripaston (One of N.V.Grassalco work location) there's a indigenous village called Pikin Saron. Their way of income is mostly through Agriculture, Hunting and fishing. The intend of this project is to provide the Pikin Saron woman group an additional way of income through manufacturing of clothes (Traditional which they can sell in Town and work cloths which they can sell for N.V.Grassalco)

**Expected Outcomes:** The woman group of Pikin Saron has an additional way of income by manufacturing cloths and selling them.

**Expected Outputs:** Traditional Cloths and work cloths manufactured by the woman group.

### Please describe how you plan to implement the return to work project: (outline key partnerships and collaborations across sectors in your country as well as any joint collaboration with other countries)

- First the building in which the woman group comes together needs some minor renovation.(See attached photo above)
- Second the woman group has just 1 Sewing machine, so additional sewing machine needs to be purchase.
- Finally training needs to be provide for the woman to make cloths.
- Ongoing monitoring of the project to ensure its sustainable

### What indicators of success will you employ? (include indicators of success that go beyond activity-level implementation)

#### Success indicators will be:

The number of woman trained

The number of cloths manufactured on monthly base

The income generated by selling these cloths.

**What other strategic opportunities have you identified that will contribute to the success and sustainability of your project?**

**(include linkages to sub-regional and regional agenda)**

Beside manufacturing work cloths for N.V. Grassalco the woman group could expand their activity to other companies

**What aspects of the training will be most useful in implementing your project? Explain**

The aspects of Community Relations, Dialogue and Rights, because during the training we talked about additional practices and regulations aimed at improving community relations in mining and also the practical implementation challenges.

**What are your future plans? (Include any additional capacity building needs for your professional development that you have identified during the course of the workshop).**

- Parts of my future plans are to continue networking with the participants of the workshop to share best practices and work on other community projects.
- One thing in which I would like to have additional information is about the limestone in Portugal, because N.V. Grassalco has a Granite quarry with great potential.

**ACTION PLAN**

Period	Month 1	Month 2	Month 3	Month 4
<b>Activities</b>				
<b>Activity 1:</b>	Have meetings with the woman group to explain the project and get their buy in.			
<b>Activity 2:</b>		Make a cost overview for the renovation of the building		
<b>Activity 3:</b>		Acquire the financial resources to renovate the building		
<b>Activity 4:</b>		Renovate the building		
<b>Activity 5:</b>			Purchase the additional sewing machine 	
<b>Activity 6:</b>			Provide the required training for the woman group.	
<b>Activity 7:</b>				Monitor the progress of the project
