RETURN TO WORK PLANS (RWP)

An initiative of the African, Caribbean and Pacific Group of States, financed by the European Union and United Nations Development Programme, and implemented by UNDP.

I. RETURN-TO-WORK PLANS

Return to Work projects are a valuable mechanism for workshop participants' personal and professional development. As part of your sponsorship, you are required to develop a return-to-work plan on a project you will undertake on your return, applying the knowledge and skills gained from workshop to influence change.

Periodic follow-up on the progress of implementation of the plan will be undertaken by UNDP.

II. REPORTING STRUCTURE FOR RETURN-TO-WORK PLANS

To facilitate ease of reporting and follow-up on your return to work project, the structure below outlines the key project elements that need to be covered in the reporting. **Please submit a Return to Work Project (RWP)** using the structure provided below.

Brief Description of the project: Data that will be presented shows the distribution of small scale miners in Tanzania. The mining of development minerals feature number two after gold mining. The data however do not show the environmental challenges faced by the small scale miners. As a return to work project, the researcher will focus on environmental challenges faced by development mineral miners in the Region of Dar es Salaam.
Expected Outcomes: <ol style="list-style-type: none">1. Better understanding of environmental impacts caused by the mining of development minerals2. Updating existing ASM trainers manual to follow Intergovernmental Forum (IGF) Training of Trainers (TOT) manual3. Testing TOT manual to artisanal small scale miners, dealing with development miners
Expected Outputs: <ol style="list-style-type: none">1. TOT manual that follows Intergovernmental Forum (IGF) ASM Guidance
Please describe how you plan to implement the return to work project: (outline key partnerships and collaborations across sectors in your country as well as any joint collaboration with other countries) <ol style="list-style-type: none">1. State Mining Corporation (STAMICO) – collaboration with team of geologists and had several meetings including LVMM Alumni at African Geoscience Mineral Center (AGMC) in Dar es Salaam on April 2017;2. Collaborate with other workshop participants who attended the IGF Training-of-Trainers workshop in Nairobi in April 2017. The workshop, which I attended together with other 14 African experts on ASM, was convened following the publication of the IGF Guidance for Governments: Managing Artisanal and Small-Scale Mining (ASM) in January 2017. RCS Global was commissioned to deliver a workshop at

which local experts would be trained in the use of the guidance.

What indicators of success will you employ? (include indicators of success that go beyond activity-level implementation)

1. IGF compliance TOT manual, that will be prepared in Swahili language to cater for Tanzanian ASM
2. Testing the IGF – ASM manual to the miners

What other strategic opportunities have you identified that will contribute to the success and sustainability of your project? (include linkages to sub-regional and regional agenda)

1. IGF compliance TOT manual could also be used to other SADC country member states.

What aspects of the training will be most useful in implementing your project? Explain

1. To gather from other participants' knowledge, skills and attitudes to enable me in training ASM community in the use of the IGF ASM guidance.
2. To identify talented participants that we could collaborate in developing and implementing the IGF guidelines on ASM

What are your future plans? (Include any additional capacity building needs for your professional development that you have identified during the course of the workshop).
