

ACP-EU Development Minerals Programme Implemented in partnership with UNDP

RETURN TO WORK (RTW) PLAN

PROGRESS REPORT

An initiative of the African, Caribbean and Pacific Group of States, financed by the European Union and United Nations Development Programme, and implemented by UNDP.

I. RETURN-TO-WORK PLANS

Return to Work projects are a valuable mechanism for workshop participants' personal and professional development. As part of your sponsorship, you were required to develop a return-to-work plan on a project you would undertake on your return, applying the knowledge and skills gained from workshop to influence change.

This follow-up on the progress of implementation of the return-to-work plan will be used to determine the most successful projects; and subsequently offer a number of selected participants the opportunity to attend future training events.

II. REPORTING STRUCTURE FOR RETURN-TO-WORK PLANS

To facilitate ease of reporting on the progress of your return to work project, the structure below outlines the key project elements that need to be covered. **Please submit the progress update on the Return to Work Project (RWP) using the structure provided below.**

GENERAL INFORMATION
Name(s): KINABO CRISPIN;
Position: Senior Lecturer, University of Dar es Salaam
Email: kinabo_2003 @ yahoo.co.uk
Phone no (office + mob): +255 22 2410013 and +255 784 458 820
Brief description of the project: Having collected the demographic data of ASM in Tanzania, the project focuses on social-economic and environmental impacts arising from mining of development minerals. Due to lack of resources, the focus of the study areas are two mining centers. These are the city of Dar es Salaam in Kigamboni and Kunduchi limestone quarries and Mbeya basalt quarry, Tanzania.
What were the expected outcomes and what outcomes did you achieve? 1. Better understanding of social, economic and environmental impacts caused by the mining of development minerals. Establishment of mining forum that formalizes the artisanal miners engaged in development minerals;

2. Updating ASM trainers manual draft sent to UNDP to follow Intergovernmental Forum (IGF) Mining Policy Framework for Tanzania

What were the expected outputs and what outputs did you achieve? Please be specific. For example, if you held a workshop or presentation to share the knowledge you gained during the training workshop: Where was the workshop held? When? How many people attended? What was the gender balance? Please also attach as an appendix any photos or other media.

On-sight discussions and demonstrations were conducted. The results of the demonstrations were presented during the International Conference on Geology, Mining, Mineral and Groundwater Resources of the Sub-Saharan Africa: Opportunities and Challenges Ahead, held at Chrismar Hotel, Livingstone (Zambia), 11-13 July, 2017;

- 1. Photos and Livingstone presentations are attached at separate sheet showing results obtained during field discussions and demonstration**
- 2. A draft of TOT training manual that follows Intergovernmental Forum (IGF) ASM Guidance and a follow up of Nairobi Workshop on TOT workshop of InterGovernmental Forum (IGF) Mining Policy Framework African Experts. The draft report is presented in separate sheet which Chapters 1, 3 and 4 are on last stages of completion;**
- 3. Development of ASM Strategy for Tanzania following IGF MPF of which Phase One on Getting Started is 90% completed and Phase 2 on Developing an ASM Management Strategy Phase is 30% completed. The last phase on Implementing the ASM Management Strategy is still not done.**

A COMPLETE REPORT ON THE PHASES IS ATTACHED ON SEPARATE SHEET.

Please describe the key partnerships and collaborations that you established in your country as well as any joint collaboration with other countries

- 1. State Mining Corporation (STAMICO) – collaboration with team of geologists and had several meetings including LVMM Alumni at African Geoscience Mineral Center (AGMC) in Dar es Salaam on April 2017;**
- 2. Collaborate with other participants who attended the International Conference on Geology, Mining, Mineral and Groundwater Resources of the Sub-Saharan Africa: Opportunities and Challenges Ahead, held at Chrismar Hotel, Livingstone (Zambia), 11-13 July, 2017.**
- 3. ASM limestone aggregate miners in Dar es salaam; ASM basalt aggregate crushing team of Mbeya both in Tanzania.**

What indicators of success have you achieved since the start of implementation? (Describe the indicators of success in relation to the expected outputs and outcomes)

- 1. Outline social economic and environmental impacts as outlined by IGF. The full report is presented on separate sheet – see powerpoint presentation for Livingstone meeting**
- 2. IGF compliance TOT draft manual, that is on preparation process, in Swahili language to cater for Tanzanian ASM and compliance to IGF MPF**

What strategic opportunities have you acted upon that have contributed to the continued success of your project? (include linkages to sub-regional and regional agendas)

What opportunities opened up for you personally as a result of your RWP?

Updating and modifying the TOT manual to be IGF-MPF compliance, which was previously prepared by the Ministry of Energy and Minerals, United Republic of Tanzania

Please explain any problems encountered during implementation of your project, highlighting any deviations from the project plans (Describe the solutions sought for the problems and corrective actions undertaken for the deviations)

No deviation however ASM do not comply with the Regulations as they are not recognized by local authorities

What specific actions have you undertaken to ensure sustainability of your project?

Having frequent contact with the miners and advice them on better mining and crushing methods. We also analyze the samples of the aggregates and return the feedbacks to the miners without charges.

Please describe any future actions in the table below

Designing and develop Training manual that follows

- IGF Mining Policy Framework for mining and sustainable development
- IGF Guidance for Tanzania on managing ASM

ACTION PLAN

Period	Month 1	Month 2	Month 3	Month 4	Month 5	Month 6	Month 7
Activities							
Activity 1: Working with ASM in Kunduchi and Kigamboni	Literature form Ministries	Collect data in Mbeya	Collect data in Dar es Salaam	Training on Legal aspects	Training on entrepreneurship	Training on safety health and environment	

Activity 2: Updating TOT draft manual for IGF MPF compliance	Improv g TOT Chapter 1	Preparatio n of TOT Chapter 2	Improving TOT Chapter 2	Improving TOT Chapter 3	Improving TOT Chapter 4		
Activity 3: Developmen t of ASM Strategy for Tanzania following IGF MPF	Phase 1 completed	Continuatio n on Phase 2	Continuatio n on Phase 2	Continuatio n on Phase 2, starting Phase 3	Continuation on Phase 3	Continuation on Phase 3	Field Testing

Attachments

1. TOT manual - draft 1
2. IGF MPF Compliance for Tanzania – update
3. Livingstone presentations

NB:

1. Please attach any evidence of commendation/award/certificate received as a result of implementing your return-to-work plan

III. SUBMISSION OF THE PROGRESS UPDATE OF THE RETURN-TO-WORK PLAN

The progress update of the Return to Work plan should be sent to:

development.minerals@undp.org.
