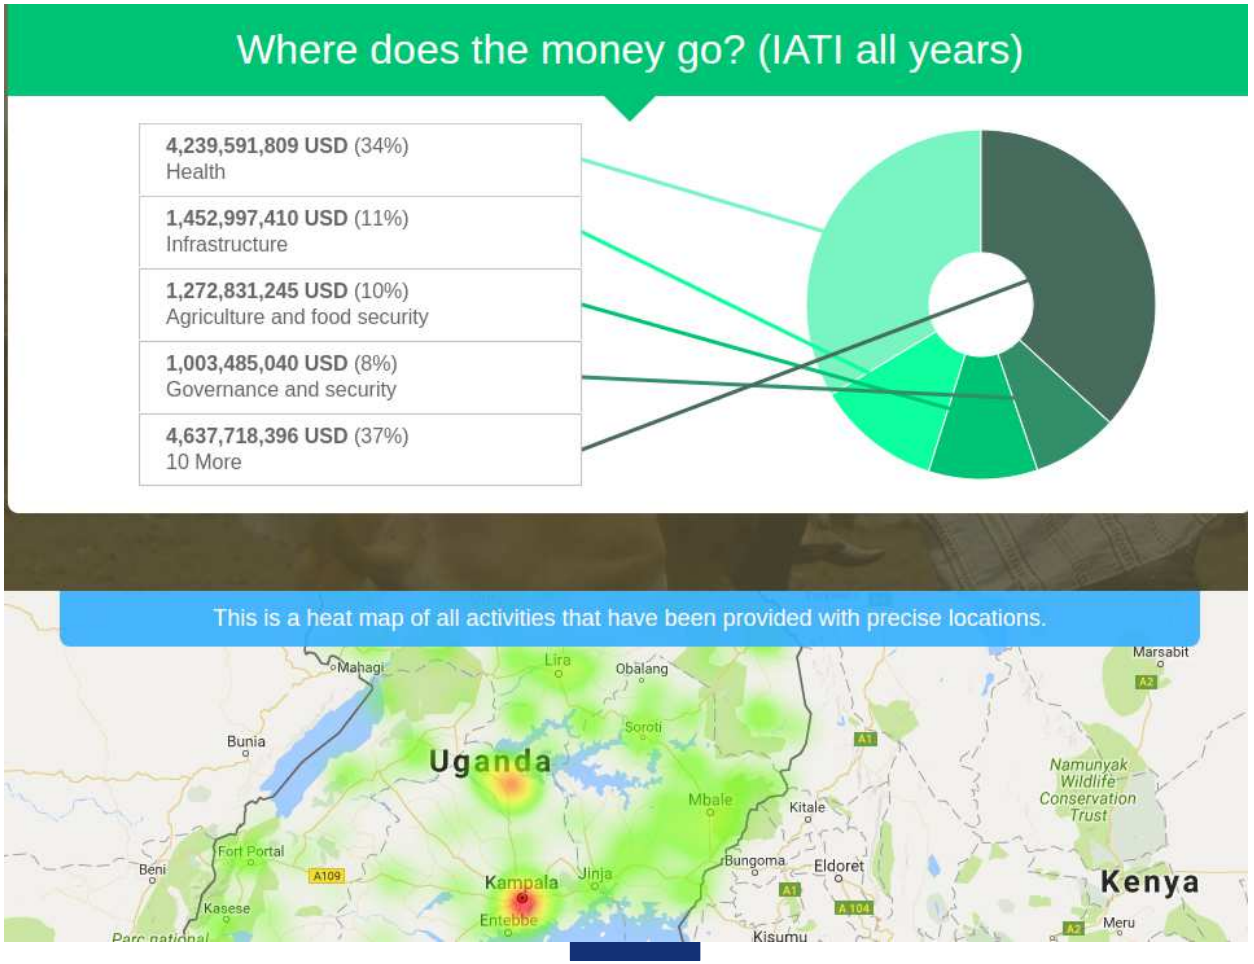
Aid data: useful, usable and in use?



Why should you be interested in aid data?

Generated by Delegation staff – DEVCO systems
In the public domain – need to ensure data quality
Can be useful for you:

- **Dialogue with partner countries**
- **Donor coordination / Joint Programming**
- **Internal information**

Introducing IATI

International Aid Transparency Initiative

International Aid Transparency Initiative (IATI)

- Launched in Accra (2008) as part of the aid effectiveness agenda
  - Principles of coordination, harmonisation, alignment, etc. – information is crucial to improve the management of aid.
- Political commitment and technical initiative
  - EU involved since the very beginning

European Commission

Why do we need IATI?

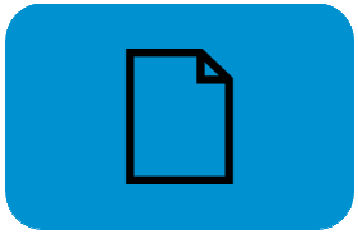
About IATI

European Commission

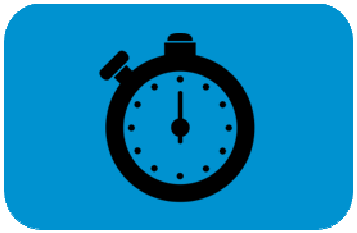
Why do we need IATI?

European Commission

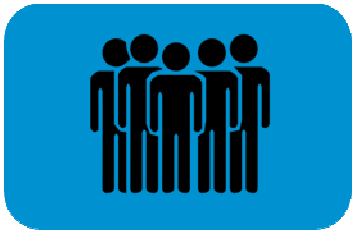
What is IATI data?



In a standardised format



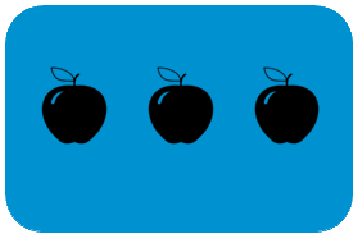
Updated Regularly



From a range of actors

All in one place

Forward looking



Comparable

IATI and the OECD CRS

IATI built upon the OECD CRS system, but is distinct and complementary

- **OECD CRS – statistical and (high-level) accountability tool**
- **IATI – aid management**

IATI is not complete (but that's OK)

OECD is not timely (but that's OK)

International Aid Transparency Initiative

What about DEVCO data?

« DEVCO publishes data to the International Aid Transparency Initiative (IATI) every month. IATI data is designed with user needs in mind, and aims to be timely, comprehensive and forward-looking. It is intended for aid management and scrutiny purposes: to allow partner countries to plan and manage budgets, based on timely and accurate financial data; and parliaments, CSOs and citizens to hold their governments to account. This data comes directly from different information systems (CRIS, ABAC, GIS, PROSPECT, AUDIT, etc) and therefore high quality output depends on high quality input into these systems.”
DEVCO Acting Director-General, Klaus Rudischhauser, March 2016

Open Contracting Partnership

Background: OCDS and IATI

Open Contracting Data Standard (OCDS)

Open contracting is about publishing and using open, accessible and timely information on contracting to engage citizens and businesses in identifying and fixing problems. At the heart of open contracting is the idea that it should be possible to follow a contracting process from planning and tender through to award and implementation:

Putting it together

Donor co-ordination

IATI exercise?

Donor coordination:

- Choose a country & sector
- Utilise the IATI websites and services you know
- What can you find out?
- What would you present to the group?

Timings:

- 15 minutes!

What next?

IATI: useful, usable and in-use?

Job done!

Or is it?

Still needs human intervention

- Verify data is correct
- Add additional local fields (sector working groups, national sectors, signature dates etc)
- Eliminate possible double counting (e.g. multi-donor trust fund)

Who and how to use it?

Delegation staff:

- Donor coordination / joint programming
- Supply data to partner country governments
- Information on activities in your country / region
- Sector Working Groups

Partner countries:

- Aid management

Citizens / civil society:

- Scrutiny

How can you use this in your job?

Ensure your staff enter high quality data
Easy / quick access to data in your country
Interact with other donors / partner govt
