EC DEVCO A2: IATI workshop

Using IATI data

IATI data is published in a format called XML. It is always published as open data, meaning it is readily available. To use it, some of the following services could be useful.

Service	Description	Notes
IATI Standard	Core documentation of the IATI materials - includes definitions, codelists and other materials. See: http://iatistandard.org/	
IATI Schema	Describes the technical aspects that are placed upon data published to the IATI Standard. See: http://iatistandard.org/schema/	
IATI Registry	A data catalogue containing URLs to Activity Files and Organisation Files, published by IATI Publishers. See: http://iatiregistry.org/	
IATI Dashboard	Provides statistics, charts and metrics on all available IATI data. Updated nightly. See: http://dashboard.iatistandard.org/	

IATI Datastore	Provides a service that gathers all data available via the IATI Registry into a single queryable source. See: http://datastore.iatistandard.org	
OIPA	A service which stores IATI data and provides a search and access facility See: https://www.oipa.nl/home	
IATI Validator	A service to allow people to check their IATI Organisation and Activity files. See: http://validator.iatistandard.org/	

Using data

There are several online sources to guide and assist with using data.

Term	Description	Notes
School of Data	Online courses about using data See: https://schoolofdata.org/	
50 Humanitarian Data Tips	Very useful guide for using and collecting data See: https://simonbjohnson.github.io/im-tips/#/frontcover	
Data Camp	More advanced data courses and techniques. See: https://www.datacamp.com/
