# **Domestic Resource Mobilisation**

## what are the key challenges to promote domestic resource mobilisation?

- ✓ Lack of Transparency
- ✓ Need for stronger democratic institutions (to enforce equitable systems)
- ✓ Inequalities in taxations (between large corporations & people & people centred business)
- ✓ Lack of data / lack of capacity at all levels to identify needs and resource sources
- ✓ Need to differentiate contexts (btw nations, actors, levels of economy)

## How could the EU contribute to tackle those challenges?

- ✓ Strengthen democratic institutions
- ✓ Support increasing transparency at all levels
- ✓ Support partnerships between btw CSOs and LAs, ensuring these partners are at the table in dialogues on DRM
- ✓ Don't participate in agreements or programmes that undermine the role of local actors
- ✓ Improve access to capacity building for CSO and LAs to better play their roles in DRM
- ✓ Support formalisation of informal sector & updating regulation of new sectors
