State of Play:

Selected results from the 2017 evaluation on SCP

2017 Evaluation of EU cooperation on SCP:

- *"high impact in terms of uptake of SCP practices and investments by MSMEs, contributing notably to the creation of green jobs"*
- SWITCH to Green: 150 green business projects, reaching 70,000 MSMEs employing 350 000 workers; 83% of MSMEs have adopted SCP practices
- Jobs secured / improved / created and environmental impact reduced (e.g. reduced resource consumption and GHG emissions)
- Policy reforms taking shape in 45 partner countries. Needs focus on policy implementation and coherence instead of development
- Stronger synergies with other areas of EU cooperation and key partners should be developed

Strategic Approach: Combining mainstreaming and dedicated programmes

Strategic Approach: the Results Chain

Enabling frameworks

Improved awareness and capacities of policy makers and stakeholders on IGE issues

Improved institutional coordination on economic, business and environmental policies

Improved stakeholder participation in green economy policy development

Green business development sustainable production and consumption patterns

Improved capacities of Business Development Services (BDS) to promote SCP practices by MSMEs

Increased networking among green businesses

Improved capacities of workers in green sectors

Improved awareness of consumers on the impact of the products they buy

Access to finance / Greening of investments

Improved capacities of financial institutions to assess green projects

Increased availability of products and financial services for MSMEs

Improved capacities of green businesses to develop bankable projects

Enabling frameworks for IGE in place in target countries (i.e. ensuring coherence between economic and environment policies across relevant areas such as the business environment, finance and investments, employment)

Uptake of SCP practices by MSMEs supported

Improved business performance of MSMEs supported

Increased market demand for environmental goods and services

Improved access to finance for green MSMEs

Increased investments in green sectors

Decoupling of economic growth from environmental degradation

Human well being

Related SDGs and Targets

Main impact
8. Decent work and economic growth (8.4)

9. Industry, innovation and infrastructure (9.4)

12. Sustainable consumption and production (all targets)
